Subject: Phase I Environmental Site Assessment Report
AutoZone 5132
777 Cranston Street
Cranston, Rhode Island 02920
Earth Science Project Number: 21-1713

Earth Science LLC (Earth Science) is pleased to provide the results of this Phase I Environmental Site Assessment (ESA) report for the above-mentioned address (the "subject property").

This assessment was performed in general conformance with the scope and limitations as detailed in the American Society for Testing and Materials (ASTM) E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

We appreciate the opportunity to provide environmental services to AutoZone, Inc. If you have any questions concerning this report, please contact our office at (949) 441-0433.

Respectfully,

Sean Rakhshani, EP
Principal

EXECUTIVE SUMMARY

Earth Science LLC (Earth Science) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of American Society for Testing and Materials (ASTM) Standard Practice E1527-13, the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312), and set forth by AutoZone, Inc. (AutoZone) of the property located at 777 Cranston Street, Cranston, Rhode Island 02920 (the “subject property”). This Phase I ESA report is designed to provide AutoZone with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

Parcel Number:	7-1-0
Current Address:	777 Cranston Street, Cranston, Rhode Island 02920
Historic Addresses:	829, 831, 833, 849, 851, 855, and 891 Cranston Street, Cranston, Rhode Island 02920
Nature of Use:	Undeveloped, vacant land
Occupant:	None
Year Built:	Not applicable (NA)
Land Area:	6.91 Acres
Building Size:	NA
Zoning:	M2

The subject property is an irregular-shaped, undeveloped, and unoccupied lot covered with heavy vegetation and improved with perimeter fencing. Access to the subject property is available from Cranston Street located along the southern boundary.

Based on available historical information, the subject property was undeveloped land until 1900 when the United Traction Electric Company constructed an 113,000 square foot brick building (known as the Trolley Barn) which was used as an electric streetcar depot and repair facility. According to available title records, the subject property was owned by Rhode Island Suburban Railway Company from 1900 until 1921 when it was purchased by the United Electric Railway Company. According to a 1921 fire insurance map, the subject property was occupied by The Rhode Island Company Repair Shops (an electric streetcar depot and repair facility) which included onsite equipping, ironworking, machining, painting, upholstery, and woodworking facilities. In 1936, Liberty Real Estate & Investment Corporation purchased the subject property and leased portions of the subject property to a gas station (reportedly from 1934 to 1939), two sign companies, a bus company, and a trucking company. In 1950, the Narragansett Brewery began to lease the subject property. According to fire insurance maps from 1950 and 1951, two gasoline tanks were located in the central portion of the subject property, just north of the main industrial building. In 1957, Liberty Real Estate & Investment Corporation declared a portion of the subject property for the construction of the Huntington Avenue Expressway.

In 1965, the subject property was purchased by the Falstaff Brewing Corporation and the Narragansett Brewery continued to occupy the subject property until the brewery operations were shut down on July 31, 1981. In 1998, eight smaller buildings at the subject property were demolished, leaving only the main industrial building (the Trolley Barn). Trolley Barn Associates, LLC acquired the subject property on October 30, 2000. On May 6, 2005 a fire occurred at the subject property which was reportedly an act of arson. On May 31, 2005 the demolition of the Trolley Barn began and the subject property has remained undeveloped land from 2005 up to the present day. According to title records, a fuel oil storage tank was installed at the subject property on December 6, 1982.

According to the prior environmental reports prepared for the subject property, two underground storage tanks (USTs) containing fuel oil which were formerly located north of the Trolley Barn supplied fuel to the building's heating system prior to installation of a natural gas-fired heating system. These two USTs containing fuel oil were reportedly removed in 1992 or 1993. Available records from the Rhode Island Department of Environmental Management (DEM) indicate that two 1,000-gallon capacity USTs containing gasoline were installed at the subject property on October 9, 1984 and were subsequently removed on October 6, 2005.

Earth Science reviewed a Remedial Action Work Plan (RAWP) (dated October 31, 2005) which was prepared for the subject property by CMG Environmental, Inc. (CMG). CMG prepared the RAWP for the portion of the former Narragansett Brewery/Falstaff Brewing Company facility which operated at the subject property. According to the RAWP, soils impacted by polynuclear aromatic hydrocarbons (PAHs) and heavy metals from the main Narragansett Brewery plant (which was historically located adjacent to the south of the subject property, across Cranston Street) were relocated to the northern and central portions of the subject property. As part of the redevelopment of the south-adjacent main Narragansett Brewery plant into a new City of Cranston police headquarters, approximately 9,400 cubic yards of soil was removed from the south-adjacent parcel. The soils impacted by PAHs and heavy metals from the former main Narragansett Brewery plant were reportedly placed at the subject property beneath an approximately 2.0-foot thick layer of clean soil acting as a cap covering the contaminated soils.

The subject property is listed in the Environmental Radius Report (ERR) as a Rhode Island Underground Storage Tank (RI UST) site. Earth Science submitted a records request to the DEM and received a copy of a UST Closure Assessment Report (CAR) (dated October 22, 2005) from the DEM. According to the CAR, two 1,000-gallon gasoline USTs and the associated piping were removed from the subject property. The USTs were reportedly manufactured of a thinner than normal gauge of steel and the USTs had disintegrated significantly and had to be removed in pieces from the tank grave. A soil sample was collected from the bottom of the tank grave and was submitted to an environmental laboratory and analyzed for volatile organic compounds (VOCs). The results of the laboratory analysis indicated the presence of toluene in the soil sample at a concentration of 39 micrograms per kilogram ($\mu\text{g}/\text{kg}$).

The available records for the subject property from the DEM's Permits, Licenses and Other Vital Environmental Records (PLOVER) database indicate that the UST case status for the subject property is listed as closed.

According to previous investigations which were summarized by CMG in the RAWP, groundwater samples were collected from six monitoring wells (PES-1 through PES-6) located at the subject property. The results of these analyses indicated the presence of trace levels of benzene (0.009 milligrams per liter [mg/L]), toluene (0.032 mg/L), ethylbenzene (0.001 mg/L), xylenes (0.02 mg/L), and methyl tertiary butyl ether (MTBE) (0.004 mg/L) in groundwater monitoring well PES-1 and chloroform (0.002 mg/L) in groundwater monitoring well PES-5. It was reported that the laboratory analyses did not identify any other analytes at or above laboratory method detection limits. According to the RAWP, groundwater at the subject property reportedly flows in a northerly direction. It was concluded that the presence of MTBE (introduced in 1979 and commonly contained in gasoline starting in the mid-1980s) suggested a more recent, offsite source for the VOCs in PES-1 which is likely located on the up-gradient end of the subject property. According the RAWP, it was suggested that the Food N' Fuel gasoline station located near the southwestern boundary of the subject property (and believed to be positioned cross-/up-gradient of the subject property) may be a possible source of the VOC impacts in groundwater at the subject property.

The Food N' Fuel facility (also known as Lucky PT Inc.) is listed in the ERR as a RI UST and a Rhode Island Leaking Underground Storage Tank (RI LUST) site. This facility is located adjacent to the west/southwest of the subject property (beyond a narrow strip of wooded land formerly occupied by railroad tracks) and is presumed to be situated hydrogeologically cross-/up-gradient relative to the subject property. This facility is currently a closed (shutdown) gas station and convenience store. According to available regulatory records, there are five permanently closed USTs and two active gasoline USTs and an open contaminant release case associated with this facility. This facility also has an open Notice of Violation (NOV) on record with the DEM pertaining to a failed tightness test due to the inability to test the interstitial spaces of the product piping systems. According to a Groundwater Monitoring and Remedial System Status Report (dated October 8, 2009) prepared for the Food N' Fuel facility, VOC concentrations in groundwater exceeded the DEM's regulatory screening levels and the contamination in groundwater extended beyond the limits of the Food N' Fuel facility (and possibly towards the subject property).

Findings

A Recognized Environmental Condition (REC) refers to the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term REC includes hazardous substances and petroleum products even under conditions that might be in compliance with laws. The term is not intended to include "*de minimis*" conditions that

do not present a threat to human health and/or the environment and that would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies. The following was identified during the course of this assessment:

- The open LUST case associated with the west/southwest-adjacent gas station and the known groundwater contamination from the west/southwest-adjacent gas station possibly impacting the subject property represent a REC.

A *Controlled Recognized Environmental Condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- The soils impacted by PAHs and heavy metals from the former main Narragansett Brewery plant which currently remain in-place at the subject property beneath an approximately 2.0-foot thick layer of clean soil represents a CREC.

A *Historical Recognized Environmental Condition (HREC)* refers to an environmental condition which would have been considered a REC in the past, but which is no longer considered a REC based on subsequent assessment or regulatory closure. The following was identified during the course of this assessment:

- The closed UST case status associated with the former USTs located at the subject property represents a HREC.

An *Environmental Issue* refers to environmental concerns identified by Earth Science, which do not qualify as RECs; however, require discussion. The following was identified during the course of this assessment:

- Earth Science did not identify any Environmental Issues during the course of this assessment.

Conclusions, Opinions, and Recommendations

Earth Science has performed a Phase I Environmental Site Assessment of the property located at 777 Cranston Street, Cranston, Rhode Island 02920 (“Subject Property”) in conformance with the scope and limitations of ASTM Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of Environmental Issues; however, RECs, CRECs, and HRECs were identified in connection with the subject property. Based on the conclusions of this assessment, Earth Science recommends the following:

- Earth Science recommends that a Phase II ESA be performed in order to assess the current conditions of the known contamination in the subsurface of the subject property, and to assess potential ongoing impacts to the subsurface of the subject property as a result of the known contaminant release at the west/southwest-adjacent gas station facility.

1.0 INTRODUCTION

Earth Science LLC (Earth Science) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of American Society for Testing and Materials (ASTM) Standard Practice E1527-13 and the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) of the property located at 777 Cranston Street, Cranston, Rhode Island 02920 (the “subject property”). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this Phase I ESA is to identify existing or potential Recognized Environmental Conditions (RECs) as defined by ASTM Standard E-1527-13, affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require cleanup, remedial action, or other response with respect to hazardous substances or petroleum products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances.

The information contained in this Phase I ESA Report will be used by the Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout, or seller financing; 2) evaluate the subject property’s overall development potential, the associated market value, and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout, or seller financing of the subject property. This Phase I ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the “*Landowner Liability Protections*,” or “*LLPs*”). ASTM Standard E-1527-13 constitutes “*All Appropriate Inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this Phase I ESA is in general accordance with the requirements of ASTM Standard E 1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database

report provided by a third-party vendor. Earth Science contacted local agencies, such as environmental health departments, fire departments, and building departments in order to determine any current and/or former hazardous substances usage, storage, and/or releases of hazardous substances on the subject property. Additionally, Earth Science researched available records for information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater at the property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater at the property.

If requested by the Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paints (LBPs), mold, and/or radon.

1.3 Limitations

Earth Science warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting a Phase I ESA of a property for the purpose of identifying RECs. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Earth Science believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Earth Science cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any State or local laws or of any Federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM, include the following: ACMs, LBPs, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, these are considered non-ASTM issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

AutoZone, Inc. (AutoZone) engaged Earth Science to perform this assessment in accordance with an agreement governing the nature, scope, and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of AutoZone. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Earth Science granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Earth Science, its officers, employees, vendors, successors, or assigns. Any such unauthorized user shall be responsible to protect, indemnify, and hold Earth Science, the Client, and their respective officers, employees, vendors, successors, and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees), and costs attributable to such use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13. Specific limitations and exceptions to this Phase I ESA are more specifically set forth below:

- Interviews past owners, operators, and occupants were not reasonably ascertainable and thus constitute a data gap.
- Earth Science was not able to adequately document the subject property use prior to 1894, and in certain subsequent years, which constitutes a data gap.
- Earth Science contacted various regulatory agencies in order to request information pertaining to any current and/or historic hazardous material usage, storage, and releases associated with the subject property; some of the agencies contacted have not responded to Earth Science as of the date of this report.

- The subject property was not accessible during field reconnaissance activities due to the presence of perimeter fencing; therefore, the subject property was visibly observed through the perimeter fencing from the property boundaries. Additionally, the subject property surfaces were covered with dense vegetation thereby limiting Earth Science's assessment of the surface conditions at the subject property.

The Client has requested the report despite the above-listed limitations; however, none of the limiting conditions or data gaps listed above are considered critical or likely to change the conclusions of the report at this time.

2.0 SITE DESCRIPTION

2.1 Site Location and Description

The subject property is located in a commercial, industrial, and residential area of Cranston, Rhode Island. Please refer to the table below for further description of the subject property.

Parcel Number:	7-1-0
Current Address:	777 Cranston Street, Cranston, Rhode Island 02920
Historic Addresses:	829, 831, 833, 849, 851, 855, and 891 Cranston Street, Cranston, Rhode Island 02920
Nature of Use:	Undeveloped, vacant land
Occupant:	None
Year Built:	Not applicable (NA)
Land Area:	6.91 Acres
Building Size:	NA
Zoning:	M2

The subject property is an irregular-shaped, undeveloped, and unoccupied lot covered with heavy vegetation and improved with perimeter fencing. Access to the subject property is available from Cranston Street located along the southern boundary.

According to the City of Cranston records, the current owner of the subject property is “*TROLLEY BARN ASSOCIATES LLC C/O FIRST HARTFORD REALTY CORP.*” Copies of the reviewed City of Cranston records are included in Appendix B of this report.

Please refer to Figure 1: Site Location Map; Figure 2: Site Plan; and Appendix A: Photographic Documentation for the location and site characteristics of the subject property.

2.2 Current Use of Adjacent Properties

During the site reconnaissance, Earth Science observed the following land uses on the properties adjacent to the subject property:

North:	ABC Supply Co. (200 Whitehall Street), undeveloped land, and A & A Auto Parts (381 Huntington Avenue)
South:	Cranston Street followed by the Cranston Police Department (5 Garfield Avenue), Garfield Avenue, multiple residences, Washington Avenue, undeveloped land, and the Huntington Expressway
East:	Huntington Expressway and railroad tracks followed by A&M International Auto Salvage (385 Huntington Avenue)
West:	Undeveloped, wooded land followed by Food’ N Fuel (873 Cranston Avenue) and multiple residences

2.3 Site Settings

The following sections provide descriptions of the site settings.

2.3.1 Topography

Elevation:	Approximately 55-75 feet above mean sea level
Slope:	Generally northeasterly

2.3.2 Geology/Soils

Geology/Soil Type:	Merrimac-Urban land complex with 0.0 to 8.0 percent slopes, Udorthents-Urban land complex, and Urban land
Farmland Status:	Not prime farmland
Landform:	Outwash plains, kames, eskers, moraines, and outwash terraces (Merrimac-Urban)
Hydrologic Soil Group:	A/D (Merrimac-Urban)

2.3.3 Hydrology/Hydrogeology

Groundwater Depth:	Reportedly 23-36 feet below ground surface (bgs)
Groundwater Flow Direction:	Reportedly northerly
Local Water Purveyor:	Providence Water (PW)
Onsite Water Wells:	None
Onsite Drywells:	None

2.3.4 Flood Zone Information

Flood Zone:	The subject property is located in Zone X-Unshaded, which is described as an area of minimal flood hazard. Zone X-Unshaded is the area determined to be outside of the 500-year flood and protected by levees from the 100-year Flood
Flood Map Date:	October 2, 2015

2.3.5 Wetlands Information

Federal Wetlands Status:	Not mapped as a wetland
---------------------------------	-------------------------

3.0 HISTORICAL INFORMATION

Earth Science obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below.

Historical Use Information

Years	Sources	Description/Uses
1894	Topographic map	Undeveloped land
1900-2005	Aerial photographs, city directories, fire insurance maps, online research, public records, and topographic maps	Industrial
2005-Present	Aerial photographs, onsite observations, and public records	Undeveloped land

3.1 Aerial Photographs

Earth Science reviewed available aerial photographs for the subject property and surrounding areas for visible indications of previous uses for the subject property and adjacent properties. Copies of select aerial photographs are included in Appendix B of this report. A summary of our findings are presented in the table below.

Summary of Aerial Photographs Reviewed

Years	Subject Property Description	Adjacent Property Descriptions
1941	The subject property is developed with a large industrial building in the southern portion and multiple smaller industrial buildings, railroad tracks, train cars, and a large industrial yard in the central and northern portions.	North: Undeveloped land, railroad tracks, and multiple industrial developments South: Road followed by multiple industrial and residential developments, undeveloped land, and three roads East: Railroad tracks followed by multiple industrial and residential developments West: Railroad tracks followed by multiple residential developments
1955	The subject property is developed with a large industrial building in the southern portion and multiple smaller industrial buildings, railroad tracks, train cars, and a large industrial yard in the central and northern portions.	North: Undeveloped land, railroad tracks, and multiple industrial developments South: Road followed by multiple industrial and residential developments and three roads East: Railroad tracks followed by multiple industrial and residential developments West: Railroad tracks followed by multiple residential developments

Years	Subject Property Description	Adjacent Property Descriptions
1960 and 1963	The subject property is developed with a large industrial building in the southern portion and multiple smaller industrial buildings, railroad tracks, train cars, and a large industrial yard in the central and northern portions.	<p>North: Undeveloped land, railroad tracks, and multiple industrial developments</p> <p>South: Road followed by a industrial development, multiple residential developments, undeveloped land, two roads, and a highway</p> <p>East: A highway and railroad tracks followed by multiple industrial developments</p> <p>West: Railroad tracks followed by a gas station and multiple residential developments</p>
1970, 1975, and 1981	The subject property is developed with a large industrial building in the southern portion and multiple smaller industrial buildings, railroad tracks, train cars, and a large industrial yard in the central and northern portions.	<p>North: Undeveloped land, railroad tracks, and multiple industrial developments</p> <p>South: Road followed by a industrial development, multiple residential developments, undeveloped land, two roads, and a highway</p> <p>East: A highway and railroad tracks followed by an industrial development</p> <p>West: Railroad tracks followed by a gas station and multiple residential developments</p>
1985, 1992, and 1995	The subject property is developed with a large industrial building in the southern portion and multiple smaller industrial buildings, railroad tracks, and a large industrial yard in the central and northern portions.	<p>North: Undeveloped land, railroad tracks, and multiple industrial developments</p> <p>South: Road followed by a industrial development, multiple residential developments, undeveloped land, two roads, and a highway</p> <p>East: A highway and railroad tracks followed by an industrial development</p> <p>West: Railroad tracks followed by a gas station and multiple residential developments</p>
2002 and 2003	The subject property is developed with a large industrial building in the southern portion and railroad tracks and a large industrial yard in the central and northern portions.	<p>North: Undeveloped land, railroad tracks, and multiple industrial developments</p> <p>South: Road followed by multiple residential developments, undeveloped land, two roads, and a highway</p> <p>East: A highway and railroad tracks followed by an industrial development</p> <p>West: Railroad tracks followed by a gas station and multiple residential developments</p>
2005	The subject property is undeveloped, recently-graded land with soil stockpiles located onsite.	<p>North: Undeveloped land, railroad tracks, and multiple industrial developments</p> <p>South: Road followed by multiple residential developments, undeveloped land, two roads, and a highway</p> <p>East: A highway and railroad tracks followed by an industrial development</p> <p>West: Undeveloped land followed by a gas station and multiple residential developments</p>

Years	Subject Property Description	Adjacent Property Descriptions
2006	The subject property is undeveloped, recently-graded land with soil stockpiles located onsite.	North: Undeveloped land, railroad tracks, and multiple industrial developments South: Road followed by multiple residential developments, a commercial development under construction, two roads, and a highway East: A highway and railroad tracks followed by an industrial development West: Undeveloped land followed by a gas station and multiple residential developments
2007 and 2008	The subject property is undeveloped, recently-graded land.	North: Undeveloped land, railroad tracks, and multiple industrial developments South: Road followed by multiple residential developments, a commercial development, two roads, and a highway East: A highway and railroad tracks followed by an industrial development West: Undeveloped land followed by a gas station and multiple residential developments
2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, and 2021	The subject property is undeveloped land.	North: Undeveloped land, railroad tracks, and multiple industrial developments South: Road followed by multiple residential developments, a commercial development, two roads, and a highway East: A highway and railroad tracks followed by an industrial development West: Undeveloped land followed by a gas station and multiple residential developments

3.2 Fire Insurance Maps

Earth Science researched fire insurance maps for the subject property and surrounding areas to investigate visible indications of previous uses for the subject property and adjacent properties. Copies of select fire insurance maps are included in Appendix B of this report. A summary of our findings are presented in the table below.

Years	Subject Property Description	Adjacent Property Descriptions
1889	The subject property is area is not depicted.	North: Area is not depicted South: Area is not depicted East: Railroad tracks followed by multiple residential dwellings West: Area is not depicted
1900	The subject property is area is not depicted.	North: Area is not depicted South: Area is not depicted East: Railroad tracks followed by a blacksmith building and two residential dwellings West: Railroad tracks followed by multiple residential dwellings

Years	Subject Property Description	Adjacent Property Descriptions
1921	<p>The subject property is developed as The Rhode Island Company Repair Shops with a large industrial building in the southern portion and a storage building in the western portion. The large industrial building includes equipping, ironworking, machining, painting, upholstery, and woodworking shops, as well and other rooms.</p>	<p>North: Undeveloped land and railroad tracks South: Cranston Street followed by the Narragansett Brewery Company plant, multiple residential dwellings, Coombs Avenue, Garfield Avenue, Washington Avenue, and New Fenner Avenue East: Railroad tracks followed by multiple industrial and residential developments West: Railroad tracks followed by multiple residential dwellings</p>
1928	<p>The subject property is area is not depicted.</p>	<p>North: Area is not depicted South: Area is not depicted East: Area is not depicted West: Railroad tracks followed by multiple residential dwellings</p>
1950 and 1951	<p>The subject property is developed as the Narragansett Brewery Company Store House with a large industrial building in the southern portion; two gasoline tanks in the central portion; a storage building in the eastern portion; a waste paper bailing building in the western portion; a building in the northern portion; and railroad tracks in the northern and central portions. The subject property is addressed as 829, 831, 833, 849, 851, and 855 Cranston Street.</p>	<p>North: Undeveloped land and railroad tracks South: Cranston Street followed by the Narragansett Brewery Company plant, Garfield Avenue, multiple residential dwellings, Washington Avenue, a funeral home, and New Fenner Avenue East: Railroad tracks followed by multiple industrial and residential developments West: Railroad tracks followed by multiple residential dwellings</p>
1956	<p>The subject property is developed as the Narragansett Brewery Company Store House with a large industrial building in the southern portion; a storage building in the eastern portion; a waste paper bailing building in the western portion; a building in the northern portion; and railroad tracks in the northern and central portions. 1975, 1977, and 1982	The subject property is area is not depicted.	North: Area is not depicted South: Area is not depicted East: Huntington Expressway and railroad tracks followed by an automobile junkyard West: Area is not depicted

3.3 City Directories

Earth Science reviewed available city directories for the subject property and adjacent properties to investigate listings that may be a potential environmental concern. Copies of select city directories are included in Appendix B of this report. A summary of our findings are presented in the table below.

City Directory Search for the Subject Property

The subject property is listed in the available city directories as follows:

Years	Listings
1939	Morin Roland Signs (829 Cranston Street)
1939	Morin Sign Company (829 Cranston Street)
1939	Consolidated Motor Lines Inc (831 Cranston Street)
1939	Liberty Real Estate Investment Corporation (831 Cranston Street)
1939	Pawtuxet Valley Motor Express (831 Cranston Street)
1939	Connecticut Motor Lines Inc. (851 Cranston Street)
1939	Prov Teaming Company Inc (851 Cranston Street)
1939	Laura's Diner (855 Cranston Street)
1943-2018	No listings

None of the available city directory listings for the subject property represent a potential environmental concern at this time.

City Directory Search for the Adjacent Properties

The following city directory listings for the adjacent properties represent a potential environmental concern:

Years	Listings
1943	Ralph Gitti Auto Painter (805 Cranston Street)
1956	Imperial Auto Body (805 Cranston Street)
2003-2008	Food' N Fuel Inc (873 Cranston Street)
2010-2018	A&M International Auto Salvage (385 Huntington Avenue)
2018	Edgewood Service Food & Fuel (873 Cranston Street)

The above city directory listings for Ralph Gitti Auto Painter and Imperial Auto Body pertain to automotive painting and body repair facilities which were formerly located adjacent to the east of the subject property (beyond the railroad tracks). These former facilities are not listed in the environmental records search report or in any of the available Federal and State regulatory agency database records. No additional information is available for these former adjacent facilities at this time. The above city directory listings for Food' N Fuel Inc and Edgewood Service Food & Fuel pertain to a gas station and convenience store which is located adjacent to the west of the subject property. This facility is further discussed Section 4.2.3 of this report. The above city directory listing for A & M International Auto Salvage pertains to an automotive salvage yard which is located adjacent to the east of the subject property (beyond the railroad tracks). This facility is further discussed Section 4.2.3 of this report.

None of the remaining city directory listings available for the adjacent properties represent a potential environmental concern at this time.

3.4 Topographic Maps

Earth Science reviewed available topographic maps for the subject property and surrounding areas for visible indications of previous uses for the subject property and adjacent properties. A summary of our findings are presented in the table below.

Summary of Topographical Maps Reviewed

Years	Subject Property Description	Adjacent Property Descriptions
1894	The subject property is undeveloped land.	North: Undeveloped land, railroad tracks, and two ponds South: Road followed by undeveloped land and a road East: Railroad tracks followed by undeveloped land West: Railroad tracks followed by undeveloped land and a road

Years	Subject Property Description	Adjacent Property Descriptions
1935 and 1939	The subject property area is shaded indicating the presence of urban development. Other than roads and major features, no specific development is depicted.	North: Shaded areas and railroad tracks South: Road followed by shaded areas and three roads East: Railroad tracks followed by shaded areas West: Railroad tracks followed by shaded areas and a road
1957	The subject property area is color-shaded indicating the presence of urban development. Other than roads and major features, no specific development is depicted.	North: Shaded areas and railroad tracks South: Road followed by shaded areas and two roads East: Railroad tracks followed by shaded areas West: Railroad tracks followed by shaded areas and a road
1970, 1975, and 1979	The subject property is developed with a large structure in the southern portion.	North: Undeveloped land and railroad tracks followed by a large structure and shaded areas South: Road followed by a large structure, multiple small structures, and two roads East: A highway and railroad tracks followed by undeveloped land West: Railroad tracks followed by shaded areas and a road
1987	The subject property is developed with a large structure in the southern portion.	North: Undeveloped land and railroad tracks followed by a large structure and multiple smaller structures South: Road followed by a undeveloped land, multiple small structures, and two roads East: A highway and railroad tracks followed by undeveloped land West: Railroad tracks followed by shaded areas and a road
1996	The subject property is developed with a large structure in the southern portion.	North: Undeveloped land and railroad tracks followed by a large structure and multiple smaller structures South: Road followed by a large structure, multiple small structures, and two roads East: A highway and railroad tracks followed by undeveloped land West: Railroad tracks followed by shaded areas and a road

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

Earth Science contacted various regulatory agencies in order to request information pertaining to any current and/or historic hazardous material usage, storage, and releases associated with the subject property. Additionally, Earth Science researched available information on the presence of AULs from these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include ICs and/or ECs, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater at the subject property. Copies of select regulatory agency records are included in Appendix B of this report.

Agency Type	Agency Name	Summary of Correspondence
Federal	USEPA	The subject property is listed in the USEPA Facility Registry Service (FRS) database as a State Master site pertaining to an Underground Storage Tank (UST) Program case.
State	Rhode Island Department of Environmental Management (DEM)	A copy of a UST Closure Assessment Report (CAR) (dated October 22, 2005) was received from the DEM. According to the CAR, two 1,000-gallon gasoline USTs and the associated piping were removed from the subject property. The USTs were reportedly manufactured of a thinner than normal gauge of steel and the USTs had disintegrated significantly and had to be removed in pieces from the tank grave. A soil sample was collected from the bottom of the tank grave and was submitted to an environmental laboratory and analyzed for volatile organic compounds (VOCs). The results of the laboratory analysis indicated the presence of toluene in the soil sample at a concentration of 39 micrograms per kilogram ($\mu\text{g}/\text{kg}$). The subject property is listed in the DEM's Permits, Licenses and Other Vital Environmental Records (PLOVER) database as a UST case and the case status for the subject property is listed as closed.

Agency Type	Agency Name	Summary of Correspondence
State	Rhode Island Office of Energy Resources (OER)	No response has been received as of the date of this report.
Air Quality Department	DEM	No air quality-related records are available for the subject property in the DEM's PLOVER database.
Building Department	City of Cranston, Building Inspection Department	No response has been received as of the date of this report.
Fire Department	City of Cranston, Fire Department	No response has been received as of the date of this report.
Health Department	Rhode Island Department of Health	A response was received stating that no records are available for the subject property.
Planning Department	City of Cranston, Planning Department	The subject property is zoned M2.
Tax Assessor	City of Cranston, Finance Department Tax Assessor	According to title records, a fuel oil storage tank was installed at the subject property on December 6, 1982.

4.2 Mapped Environmental Records Search

Earth Science obtained an Environmental Radius Report (ERR) prepared by Nationwide Environmental Title Research, LLC (NETR) for the subject property. The Federal, State, and local agency environmental records contained in the NETR ERR are compiled from publicly available sources and the locations of the listed sites are plotted utilizing a geographic information system, which geocodes the site addresses. Using the ASTM definition of migration, Earth Science considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed in the ERR, which includes solid, liquid, and vapor. A copy of the ERR is included in Appendix C of this report.

4.2.1 Regulatory Database Summary

The following table provides a summary of the ERR findings.

Environmental Regulatory Listing	Number Of Sites That Are:			Any Sites Of Concern ?
	<1/4 Mile Away	1/4-1/2 Mile Away	>1/2-1 Mile Away	
National Priorities List (NPL)	0	0	0	NA
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List	0	0	1	NO

Environmental Regulatory Listing	Number Of Sites That Are:			Any Sites Of Concern ?
	<1/4 Mile Away	1/4-1/2 Mile Away	>1/2-1 Mile Away	
CERCLIS No Further Remedial Action Planned (NFRAP)	0	0	0	NA
Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Facilities	0	0	0	NA
RCRA Non-CORRACTS Treatment, Storage and Disposal (TSD) Facilities	0	0	0	NA
Federal Institutional Control/Engineering Control (IC/EC) Registry	0	0	0	NA
Emergency Response Notification System (ERNS)	0	0	0	NA
United States (US) Toxic Release Inventory (TRI)	0	4	15	NO
US RCRA Conditionally Exempt Small/Small/Large Quantity Generators (CESQG/SQG/LQG)	11	35	165	NO
US Assessment, Cleanup and Redevelopment Exchange System (ACRES) Database (Brownfields)	0	4	21	NO
US National Pollution Discharge Elimination System (NPDES)	0	3	9	NO
US Air Facility System (AIRS/AFS)	1	5	20	NO
Rhode Island Underground Storage Tanks (USTs)	52	108	352	YES
Rhode Island Leaking Underground Storage Tanks (LUSTs)	6	7	28	YES
Rhode Island Environmental Land Use Restriction (ELUR) Sites	0	2	35	NO

4.2.2 Subject Property Listings

The subject property is listed in the ERR and detailed below:

- Trolley Barn (addressed as 891 Cranston Street) is listed in the ERR as a RI UST site. According to available DEM records, two 1,000-gallon capacity USTs containing gasoline were installed at the subject property on October 9, 1984 and were subsequently removed on October 6, 2005. The USTs were reportedly manufactured of a thinner than normal gauge of steel and the USTs had disintegrated significantly and had to be removed in pieces from the tank grave. A soil sample was collected from the bottom of the tank grave and was submitted to an environmental laboratory and analyzed for VOCs. The results of the laboratory analysis indicated the presence of toluene in the soil sample at a concentration of 39 µg/kg. The DEM's UST case status for the subject property is listed as closed. Based on the closed status of the UST case, this ERR listing is not expected to represent a significant environmental concern for the subject property at this time.

4.2.3 Adjacent Property Listings

The following adjacent properties are listed in the ERR:

- Lucky PT Inc. (addressed as 873 Cranston Street) is listed in the ERR as a RI UST and RI LUST site. This facility is located adjacent to the west/southwest of the subject property (beyond a narrow strip of wooded land formerly occupied by railroad tracks) and is presumed to be situated hydrogeologically cross-/up-gradient relative to the subject property. This facility is currently a closed (shutdown) Food N' Fuel gas station and convenience store. According to available regulatory records, there are five permanently closed USTs and two active gasoline USTs and an open contaminant release case associated with this facility. This facility also has an open Notice of Violation (NOV) on record with the DEM pertaining to a failed tightness test due to the inability to test the interstitial spaces of the product piping systems. According to a Groundwater Monitoring and Remedial System Status Report (dated October 8, 2009) prepared for the Food N' Fuel facility, VOC concentrations in groundwater exceeded the DEM's regulatory screening levels and the contamination in groundwater extended beyond the limits of the Food N' Fuel facility (and possibly towards the subject property). Based on the open status of the LUST case and the NOV case and the presumed groundwater flow direction in the area, this ERR listing represents a significant environmental concern for the subject property at this time.
- IPEC Inc./Group IV (addressed as 200 Whitehall Street) is listed in the ERR as a US RCRA Generator and RI UST site. This facility is located adjacent to the northwest of the subject property and is presumed to be situated hydrogeologically down-gradient relative to the subject property. This facility is currently occupied by a building material supply store. According to available regulatory records, three USTs were installed at the subject property on October 9, 1984 and were subsequently

removed. According to available DEM records, the UST case status for this facility is listed as closed. According to available regulatory records, there are no open contaminant release cases or open violations for this facility. Based on the closed status of the UST case, the lack of open release/violation cases, and the presumed groundwater flow direction in the area, this ERR listing is not expected to represent a significant environmental concern for the subject property at this time.

- A&M International Auto Parts (addressed as 385 Huntington Avenue) is listed in the ERR as a US RCRA Generator site. This facility is located adjacent to the east of the subject property (beyond the railroad tracks) and is presumed to be situated hydrogeologically down-gradient relative to the subject property. This facility is currently occupied by an automotive junkyard. According to available regulatory records, there are no open contaminant release cases or open violations for this facility. Based on the lack of open release/violation cases and the presumed groundwater flow direction in the area, this ERR listing is not expected to represent a significant environmental concern for the subject property at this time.

4.2.4 Non-Adjacent Property Listings

The non-adjacent sites listed in the ERR are not likely to represent a significant environmental concern for the subject property at this time based on their distances from the subject property, lack of documented releases/violations, presumed direction of groundwater flow, current regulatory status, or other considerations.

4.2.5 Orphan Listings

No orphan listings likely to impact the subject property are identified in the ERR.

4.3 Vapor Encroachment Screening

The ASTM definition of a Vapor Encroachment Condition (VEC) is “the presence or likely presence of chemical of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil and/or groundwater either on or near the target property.”

A VEC is a broad concern involving contamination or potential contamination from subsurface vapor migration, while a Vapor Intrusion Condition (VIC) is focused on the migration or potential migration of contaminant vapors into building spaces.

A VIC, if present, can potentially pose a health risk to the occupants of the building. A VIC is commonly associated with the presence of VOC contamination, such as petroleum hydrocarbon or chlorinated solvent releases. A VIC can be caused by contamination from onsite or offsite sources, or a combination of both.

Earth Science has performed a Tier 1 Vapor Encroachment Screening (VES) in general accordance with the scope of work and limitations of ASTM Standard Practice E 2600-15 for the subject property. The purpose of this Tier 1 VES is to identify an existing or potential VEC affecting the subject property, as defined by ASTM Standard E 2600-15.

Based on the findings of the Tier 1 VES conducted by Earth Science, a VEC may be an issue of concern in connection with the subject property at this time. An additional evaluation is warranted in order to determine whether a potential VEC is present at the subject property. This additional evaluation (i.e., a Phase II ESA) is further discussed in Section 7.0 of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

5.1 User Provided Information

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the Report User must provide the following information (if available) to the *Environmental Professional*. Failure to provide this information could result in a determination that *All Appropriate Inquiry* is not complete. The Report User is asked to provide information or knowledge of the following:

- Environmental cleanup liens that are filed or recorded against the subject property.
- Activity and land use limitations that are in place against the subject property or that have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the LLPs.
- Actual knowledge of the Report User.
- Relationship of the purchase price to the fair market value of the subject property if it were not contaminated.
- Commonly known or *reasonably ascertainable* information about the subject property.
- The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation.
- The reason for preparation of this Phase I ESA.

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Earth Science requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance. Pursuant to ASTM E 1527-13, Earth Science requested the following site information from AutoZone (User of this report).

User Requested Information	Provided By User?	Description of Provided Documents/ Information
Environmental Questionnaire	Yes	On behalf of the subject property owner, Mr. Stephen VanWormer, Project Manager with CMG Environmental, Inc. completed the questionnaire. Please refer to the

User Requested Information	Provided By User?	Description of Provided Documents/ Information
		questionnaire included in Appendix B for further details.
Title records	Yes	Multiple title records were obtained from the City of Cranston, Finance Department Tax Assessor. According to title records, a fuel oil storage tank was installed at the subject property on December 6, 1982.
Environmental liens or activity and use limitations	No	
Specialized knowledge	No	
Actual knowledge	No	
Valuation reduction for environmental issues	No	
Identification of Key Site Manager	Yes	Mr. Shamus Finney, Senior General Superintendent with EH&N Construction Company, a subsidiary of First Hartford Realty Corporation and a representative for the subject property owner, was identified as the Key Site Manager.
Reason for performing the Phase I ESA	Yes	Refer to Section 1.1
Prior environmental reports	Yes	Earth Science was provided copies of the following reports by Mr. Finney: -Letter to the Office of Waste Management, Rhode Island Department of Environmental Management, Former Narragansett Brewery Facility, Cranston Street and Garfield Avenue, Cranston, Rhode Island, prepared by CMG Environmental, Inc., dated October 31, 2006. -Remedial Action Work Plan, Trolley Barn Portion of Former Narragansett Brewery, prepared by CMG Environmental, Inc., dated October 31, 2005.
Other documents/information provided	Yes	AutoZone provided general real estate information for the subject property.

5.2 Interviews

Earth Science conducted the following interviews to obtain environmental information associated with the Subject Property.

Interviewee	Interviewed ?	Description of Information Obtained From Interview
Subject property owner	Yes	Mr. Finney was interviewed by Earth Science over the telephone. According to Mr. Finney, the soils impacted by PAHs and heavy metals from the former main Narragansett Brewery plant (historically located to the south of the subject property) were placed at the subject property beneath an approximately 2.0-foot thick layer of clean soil acting as a cap covering the contaminated soils. Earth Science inquired about a former fuel oil storage tank which was installed at the subject property on December 6, 1982 after the Narragansett Brewery operations were shut down on July 31, 1981. Mr. Finney opined that the former fuel oil storage tank may have been an aboveground storage tank.
Report user	Yes	AutoZone provided general real estate information for the subject property.
Key site manager	Yes	Please refer to the subject property owner interview section above.
Past owners, operators, and occupants of the subject property	No	Past owners, operators, and occupants of the subject property were not available to be interviewed.
Others	No	As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

6.0 SITE RECONNAISSANCE

The subject property was inspected on July 22, 2021. Earth Science was unaccompanied during field reconnaissance activities. The subject property was not accessible during field reconnaissance activities due to the presence of perimeter fencing; therefore, the subject property was visibly observed through the perimeter fencing from the property boundaries. Additionally, the subject property surfaces were covered with dense vegetation thereby limiting Earth Science’s assessment of the surface conditions at the subject property.

6.1 General Site Characteristics

The following table describes the general site characteristics observed at the subject property.

Site Characteristic	Observed at the Subject Property?	Description of Observations
Solid waste disposal	No	
Sewage discharge and disposal	No	
Surface water drainage	No	
Surface impoundments, natural catch basins, settling ponds, drywells, wetlands, or lagoons	No	
Heating or cooling systems	No	
Wells or cisterns	No	
Wastewater/industrial discharge	No	
Septic systems	No	
Other significant characteristics	Yes	Remnants of concrete slabs were observed in the southwestern portion of the subject property. Trash and debris were observed in the southern portion of the subject property near the perimeter fencing. Dense vegetation was observed throughout the subject property.

6.2 Environmental Hazards

The following table describes the environmental hazards observed at the subject property.

Environmental Hazard	Observed at the Subject Property?	Description of Observations
Hazardous materials/petroleum products stored or used onsite	No	

Environmental Hazard	Observed at the Subject Property?	Description of Observations
Aboveground/underground hazardous substance/petroleum storage tanks	No	
Evidence of releases or spills	No	
Evidence of polychlorinated biphenyl-containing equipment	No	
Strong, pungent, or noxious odors	No	
Pools of liquid	No	
Drains, sumps, or clarifiers	No	
Pits, ponds, or lagoons	No	
Stressed vegetation	No	
Landfill or radiological hazards	No	
Other environmental hazards	No	

6.3 Non-ASTM Environmental Concerns

The following table describes the non-ASTM environmental concerns observed at the subject property.

Non-ASTM Environmental Concern	Observed at the Subject Property?	Description of Observations
Suspect ACMs	No	
Suspect LBPs	No	
Suspect mold	No	
Radon	NA	According to the USEPA, the subject property is mapped in Radon Zone 2, where the average predicted indoor radon screening levels range from 2.0 to 4.0 pico Curies per Liter (pCi/L). Radon testing was not performed as part of this assessment.
Lead in drinking water	NA	According to PW's 2020 Water Quality Report, water supplied to the subject property is in compliance with all Federal and State regulations, including lead standards. Water quality testing was not performed as part of this assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

A gas station and convenience store (Food N' Fuel, addressed as 873 Cranston Street) is located adjacent to the west/southwest of the subject property (beyond a narrow strip of wooded land formerly occupied by railroad tracks). An automotive junkyard (A&M International Auto Parts, addressed as 385 Huntington Avenue) is located adjacent to the east of the subject property (beyond the railroad tracks). These two facilities are further discussed in Section 4.2.3 of this report.

No other adjacent properties of concern were identified during the field reconnaissance activities.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *Recognized Environmental Condition (REC)* refers to the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term REC includes hazardous substances and petroleum products even under conditions that might be in compliance with laws. The term is not intended to include "*de minimis*" conditions that do not present a threat to human health and/or the environment and that would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies. The following was identified during the course of this assessment:

- The open LUST case associated with the west/southwest-adjacent gas station and the known groundwater contamination from the west/southwest-adjacent gas station possibly impacting the subject property represent a REC.

A *Controlled Recognized Environmental Condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- The soils impacted by PAHs and heavy metals from the former main Narragansett Brewery plant which currently remain in-place at the subject property beneath an approximately 2.0-foot thick layer of clean soil represents a CREC.

A *Historical Recognized Environmental Condition (HREC)* refers to an environmental condition which would have been considered a REC in the past, but which is no longer considered a REC based on subsequent assessment or regulatory closure. The following was identified during the course of this assessment:

- The closed UST case status associated with the former USTs located at the subject property represents a HREC.

An *Environmental Issue* refers to environmental concerns identified by Earth Science, which do not qualify as RECs; however, require discussion. The following was identified during the course of this assessment:

- Earth Science did not identify any Environmental Issues during the course of this assessment.

Conclusions, Opinions, and Recommendations

Earth Science has performed a Phase I Environmental Site Assessment of the property located at 777 Cranston Street, Cranston, Rhode Island 02920 ("Subject Property") in conformance with the scope and limitations of ASTM Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of Environmental Issues; however, RECs, CRECs, and HRECs were identified in connection with the subject property. Based on the conclusions of this assessment, Earth Science recommends the following:

- Earth Science recommends that a Phase II ESA be performed in order to assess the current conditions of the known contamination in the subsurface of the subject property, and to assess potential ongoing impacts to the subsurface of the subject property as a result of the known contaminant release at the west/southwest-adjacent gas station facility.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Earth Science has performed a Phase I Environmental Site Assessment of the property located at 777 Cranston Street, Cranston, Rhode Island 02920 in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to, or deletions from, this protocol are discussed earlier in this report.

By signing below, Earth Science declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an *Environmental Professional* as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Earth Science has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:12,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: State of Rhode Island: Bristol, Kent, Newport, Providence, and Washington Counties
Survey Area Data: Version 20, Jun 9, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 3, 2019—Aug 2, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
MU	Merrimac-Urban land complex, 0 to 8 percent slopes	0.5	6.2%
UD	Udorthents-Urban land complex	7.2	89.7%
Ur	Urban land	0.3	4.2%
Totals for Area of Interest		8.0	100.0%

State of Rhode Island: Bristol, Kent, Newport, Providence, and Washington Counties

MU—Merrimac-Urban land complex, 0 to 8 percent slopes

Map Unit Setting

National map unit symbol: 2tyr9
Elevation: 0 to 820 feet
Mean annual precipitation: 36 to 71 inches
Mean annual air temperature: 39 to 55 degrees F
Frost-free period: 140 to 250 days
Farmland classification: Not prime farmland

Map Unit Composition

Merrimac and similar soils: 45 percent
Urban land: 40 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Merrimac

Setting

Landform: Outwash plains, kames, eskers, moraines, outwash terraces
Landform position (two-dimensional): Backslope, footslope, shoulder, summit
Landform position (three-dimensional): Side slope, crest, riser, tread
Down-slope shape: Convex
Across-slope shape: Convex
Parent material: Loamy glaciofluvial deposits derived from granite, schist, and gneiss over sandy and gravelly glaciofluvial deposits derived from granite, schist, and gneiss

Typical profile

Ap - 0 to 10 inches: fine sandy loam
Bw1 - 10 to 22 inches: fine sandy loam
Bw2 - 22 to 26 inches: stratified gravel to gravelly loamy sand
2C - 26 to 65 inches: stratified gravel to very gravelly sand

Properties and qualities

Slope: 0 to 8 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Somewhat excessively drained
Runoff class: Very low
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to very high (1.42 to 99.90 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None

Calcium carbonate, maximum content: 2 percent
Maximum salinity: Nonsaline (0.0 to 1.4 mmhos/cm)
Sodium adsorption ratio, maximum: 1.0
Available water capacity: Low (about 4.6 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2e
Hydrologic Soil Group: A
Ecological site: F144AY022MA - Dry Outwash
Hydric soil rating: No

Description of Urban Land

Typical profile

M - 0 to 10 inches: cemented material

Properties and qualities

Slope: 0 to 8 percent
Depth to restrictive feature: 0 inches to manufactured layer
Runoff class: Very high
Capacity of the most limiting layer to transmit water (Ksat): Very low
(0.00 to 0.00 in/hr)
Available water capacity: Very low (about 0.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydrologic Soil Group: D
Hydric soil rating: Unranked

Minor Components

Sudbury

Percent of map unit: 5 percent
Landform: Outwash plains, terraces, deltas
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Tread, dip
Down-slope shape: Concave
Across-slope shape: Linear
Hydric soil rating: No

Hinckley

Percent of map unit: 5 percent
Landform: Kames, deltas, outwash plains, eskers
Landform position (two-dimensional): Summit, shoulder, backslope
Landform position (three-dimensional): Nose slope, head slope,
side slope, crest, rise
Down-slope shape: Convex
Across-slope shape: Convex, linear
Hydric soil rating: No

Windsor

Percent of map unit: 5 percent
Landform: Deltas, outwash plains, dunes, outwash terraces

Landform position (three-dimensional): Riser, tread
Down-slope shape: Linear, convex
Across-slope shape: Linear, convex
Hydric soil rating: No

and Washington Counties
Survey Area Data: Version 20, Jun 9, 2020

State of Rhode Island: Bristol, Kent, Newport, Providence, and Washington Counties

UD—Udorthents-Urban land complex

Map Unit Setting

National map unit symbol: 9lxj
Elevation: 0 to 670 feet
Mean annual precipitation: 44 to 50 inches
Mean annual air temperature: 48 to 50 degrees F
Frost-free period: 120 to 211 days
Farmland classification: Not prime farmland

Map Unit Composition

Udorthents and similar soils: 70 percent
Urban land: 20 percent
Minor components: 10 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Udorthents

Setting

Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Human transported material

Typical profile

A - 0 to 12 inches: sandy loam
C1 - 12 to 25 inches: sandy loam
C2 - 25 to 60 inches: stratified sand to very gravelly coarse sand

Properties and qualities

Slope: 0 to 15 percent
Depth to restrictive feature: More than 80 inches
Runoff class: Very low
Capacity of the most limiting layer to transmit water (Ksat): High
(2.00 to 6.00 in/hr)
Depth to water table: About 42 to 54 inches
Frequency of flooding: None
Frequency of ponding: None
Available water capacity: Low (about 5.5 inches)

Description of Urban Land

Setting

Parent material: Human transported material

Typical profile

R - 0 to 6 inches: variable

Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 8s
Hydric soil rating: No

SPECIAL FLOOD HAZARD AREAS		Without Base Flood Elevation (BFE) <i>Zone A, V, A99</i>
		With BFE or Depth <i>Zone AE, AO, AH, VE, AR</i>
		Regulatory Floodway
OTHER AREAS OF FLOOD HAZARD		0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile <i>Zone X</i>
		Future Conditions 1% Annual Chance Flood Hazard <i>Zone X</i>
		Area with Reduced Flood Risk due to Levee. See Notes. <i>Zone X</i>
		Area with Flood Risk due to Levee <i>Zone D</i>
OTHER AREAS		NO SCREEN Area of Minimal Flood Hazard <i>Zone X</i>
		Effective LOMRs
GENERAL STRUCTURES		Area of Undetermined Flood Hazard <i>Zone D</i>
		Channel, Culvert, or Storm Sewer
		Levee, Dike, or Floodwall
OTHER FEATURES		20.2 Cross Sections with 1% Annual Chance Water Surface Elevation 17.5
		Coastal Transect
		Base Flood Elevation Line (BFE)
		Limit of Study
		Jurisdiction Boundary
MAP PANELS		Digital Data Available
		No Digital Data Available
		Unmapped
		The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on **8/7/2021 at 4:01 PM** and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Date Created

08/06/2021

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

Historical Aerial Photographs

Aerial photographs of the site location were used to create a multi-page file named AerialPhotos. Each aerial photograph has a title block that includes the year and scale of the photograph as well as project information submitted at the time the order was placed. The years provided are:

1941, 1955, 1960, 1963, 1970, 1975, 1981, 1985, 1992, 1995, 2003, 2009, 2010, 2012, 2014, 2016, 2018

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Cranston, RI; 1963-2018

Providence, RI; 1939-1986, 1998-2018

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Garfield Avenue (1963-1987, 2002-2018)

Cranston Street (1939-1986, 1998-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1889, 1900, 1921, 1950, 1956, 1972, 1975, 1977, 1982

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

**RE: *Closure Assessment Report for Two Underground Storage Tanks
The Trolley Barn, 891 Cranston Street, Cranston, Rhode Island***

Dear Mr. Greenwald:

Clean Environment Inc. (CEI) is pleased to submit this UST Closure Assessment Report for two-1,000 gallon underground storage tanks (USTs) and associated piping from the property known as the Trolley Barn located at 891 Cranston Street, Cranston, Rhode Island (herein referred to as "the Site"). The owner of the USTs is listed as Trolley Barn Associates, LLC in Rhode Island Department of Environmental Management (RI DEM) records (Facility No. 04023). The closed USTs included two-1,000 gallon gasoline USTs. Following is a description of the USTs which were closed, the condition of the USTs and the environmental condition of the soils excavated from the UST locations.

The USTs were manufactured of a thinner than normal gauge of steel and the USTs had disintegrated significantly and had to be removed from the tank grave in pieces. Although the USTs had numerous holes, elevated levels of volatile organic compounds (VOCs) were not detected in the soil surrounding the closed USTs.

A soil sample was collected from the bottom of the tank grave and was submitted to the laboratory for volatile organic compounds, (VOCs) analysis via EPA Method 8260. The results of this analysis indicated a Toluene level of 39 $\mu\text{g}/\text{Kg}$.

Based upon head space analysis, the groundwater classification of the area, laboratory analysis and visual observations, no further environmental investigation of the Site is warranted at this time.

Please call me at (401) 295-0840 if you have any questions concerning this Report.

Sincerely,
CLEAN ENVIRONMENT INC.

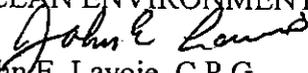

John E. Lavoie, C.P.G.
President

1.00 INTRODUCTION

The location of the Site is currently the former location of the Trolley Barn and the USTs were discovered during the demolition of the Site.

Visual observations and head space analysis of the soils excavated from the UST locations did not indicate a release of petroleum products from the USTs had occurred at the Site. Numerous holes were observed in the closed USTs and it is suspected the USTs had been out of service for many years and the USTs had disintegrated to a point where there no longer had any structural integrity and had to be excavated from the tank grave in pieces.

Soil samples were collected from the soils surrounding the UST locations and field screened for the presence of volatile organic compounds (VOC's) using an HNU Systems, Inc. P-101 photoionization meter equipped with a 10.2 ev lamp/probe. The soil samples were field screened for head space analysis according to the following protocols:

- * One eight ounce clean glass jar was half-filled with the representative soil sample to be analyzed. Exposure of the sample to air is minimized during sample collection.
- * The jar is quickly covered with aluminum foil and then capped. The head space is allowed to develop for at least ten minutes. The jar is vigorously shaken for 15 seconds at the beginning and the end of the development period.
- * The cap is removed and the probe of the PID is poked through the aluminum foil to measure the concentration of volatile organic compounds in the air
- * The highest reading obtained during the sample screening is recorded.
- * The PID reading is yields total organic vapors in parts per million.

2.00 UST CLOSURES

On Thursday, October 6, 2005 personnel from Marshall Environmental (ME), Coventry Building and Wrecking Co. and CEI arrived at the Site at 7:30 AM to initiate the UST closures. The closed USTs included two-1,000 gallon gasoline USTs.

The UST's had been out of service for many years and since the USTs had been manufactured of a thinner than normal gauge of steel, the USTs had disintegrated significantly with numerous holes and the USTs had no structural integrity. Head space analysis of composite soil samples collected from the soil surrounding the closed USTs did not indicate elevated levels of VOCs in the soil samples collected from the UST excavation.

Groundwater was not encountered during the excavation of the USTs and the materials encountered during the UST excavation consisted of sand and graver and appeared to be natural to the Site.

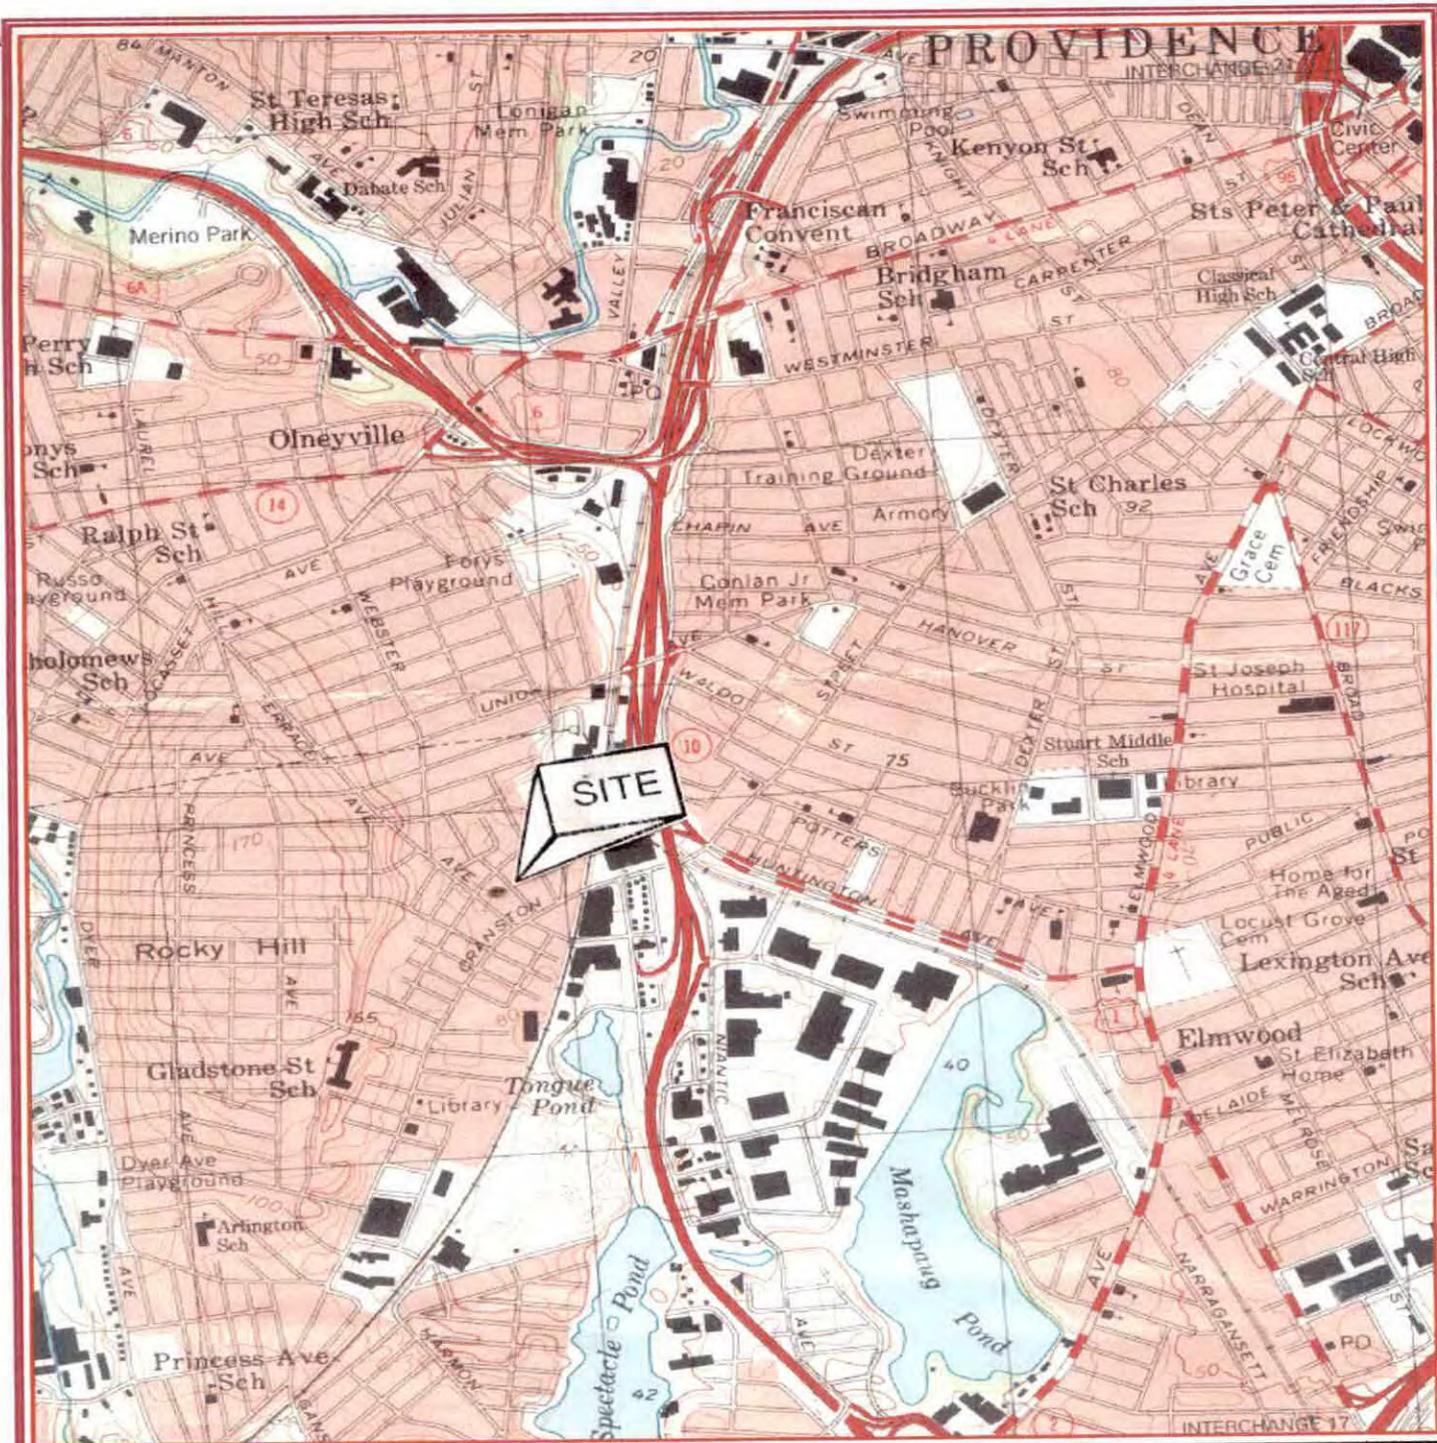

Since the USTs had decayed to a point where they had to be removed in pieces, no evacuation of the interior of the USTs was required.

NOTE: Petroleum sludge was not present when the USTs were closed and no sludge disposal documentation is available for this Report.

The USTs were transported to the James G. Grant Co., Inc. in Readville, Massachusetts for disposal.

Tank disposal documentation is included in Appendix B of this Report.

Head space analysis of soil samples collected from under the USTs were all below 5 ppm on the HNU. The head space analysis are displayed in Table I.

3.00 SOIL SAMPLING AND ANALYSIS

Since numerous holes were discovered in the closed USTs, the RI DEM required one soil sample be collected from tank grave area and laboratory analyzed for volatile organic compounds (VOCs) via EPA Method 8260. The results of the soil analysis indicated a Toluene level of 39 $\mu\text{g}/\text{Kg}$. The results of this analysis are displayed in the following Table:

Table II
Soil Analysis Results

<i>Sample No.</i>	<i>VOCs Via Method 8260</i>	<i>RI DEM-GB Direct Exposure Criteria</i>
Gasoline Tank Grave	39 $\mu\text{g}/\text{Kg}$	10,000,000 $\mu\text{g}/\text{Kg}$

4.00 TANK TESTING RECORDS

The Owner of the Site did not have tank testing records to be included in this Report.

5.00 GROUNDWATER CLASSIFICATION

According to the Rhode Island Geographic Information System (RIGIS) the groundwater in the vicinity of the Site is currently classified as GB.

6.00 SOIL CLASSIFICATION

The Unified Soil Classification System (USCS) was utilized to classify the soils located on the Site. The USCS divides soil into 3 main groups; coarse grain, fine grain, and highly organic. Each group is then subdivided. Course grain into gravels and sand, fine grains into silts, clays and organic clays. The soil of the Site is classified as fine to course grain sand with traces of silt and clay.

7.00 MONITORING WELL GAUGING

No on-Site groundwater monitoring wells observed on the property at the time of the UST closure.

8.00 PUBLIC/PRIVATE WATER SUPPLY WELLS

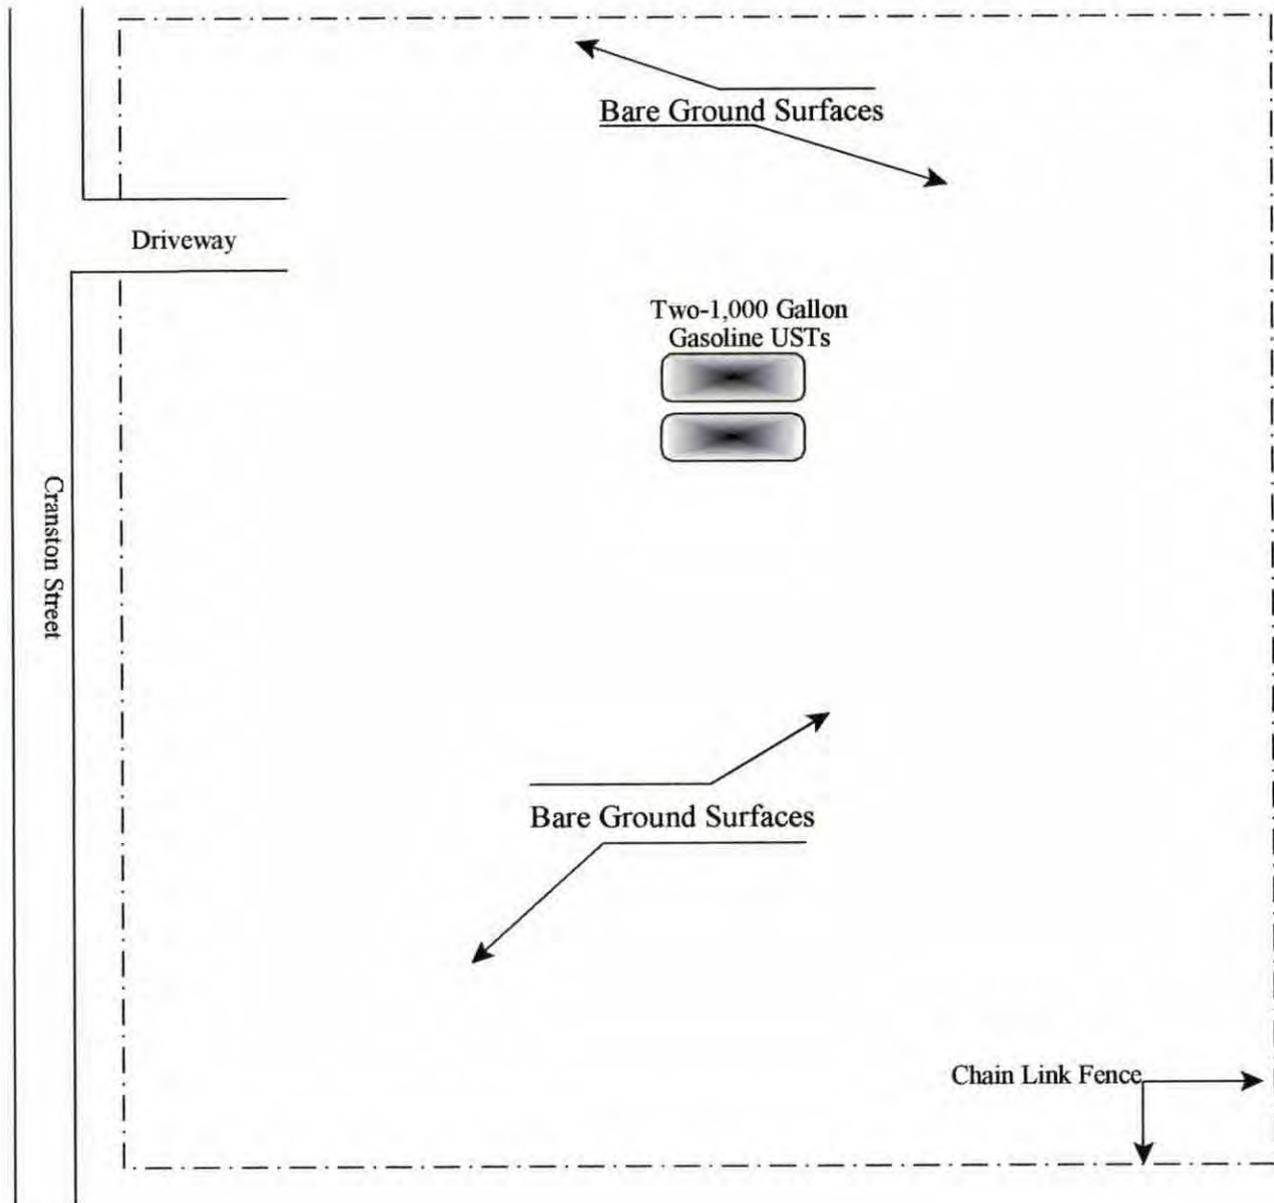

According to RIGIS, no public or private water supply wells are located on the Site.

9.00 SENSITIVE RECEPTORS

Underground utilities are the only sensitive receptors observed on the Site at the time of the UST closure.

10.00 CONCLUSIONS AND RECOMMENDATIONS

Visual observations and head space analysis of composite soil samples collected from the soil under the closed gasoline USTs did not indicate a release of petroleum products to the Site's soil in the area surrounding the closed USTs. VOC levels detected by head space analysis indicated petroleum levels below RI DEM regulatory limits. The results of the soil analysis collected from the tank grave area indicated a Toluene level of 39 $\mu\text{g}/\text{Kg}$. Based upon this data no further environmental investigation of the Site is warranted at this time.

RI DEM Facility I.D. #4023

Dear Mr. Greenwald

The Office of Waste Management has reviewed a Closure Assessment Report for the above-referenced facility, prepared by Clean Environment, Inc., and dated October 25, 2005.

Based on the representations made by the consultant in the report, no further action is presently required by this Office. However, the D.E.M. reserves the right to order future corrective measures should any significant contamination in groundwater or soil become apparent.

Enclosed for your records is a Certificate of Closure for the closed underground storage tank(s).

Sincerely,

A handwritten signature in black ink that reads "Kevin Gillen". The signature is written in a cursive, flowing style.

Dear Mr. r:

RE: Underground Storage Tank Closure; Facility ID #04023
Trolly Barn, 891 Cranston Street, Cranston

The Office of Waste Management has reviewed the Permanent Closure Application For Underground Storage Tank(s) for the above referenced property. The following UST(s) are approved to be closed on Thursday, October 6, 2005:

UST ID #	VOLUME	STORED MATERIAL	METHOD OF CLOSURE
001	1,000 gallons	Gasoline	Removal
002	1,000 gallons	Gasoline	Removal

All USTs are to be removed and handled as described in the closure application. This approval letter along with a copy of the UST Closure Application must accompany the tank(s) during transit to the proper disposal facility.

IF ANY CONTAMINATION IS FOUND IN THE VICINITY OF OR AROUND THE SUBJECT UST(S), IMMEDIATE NOTIFICATION TO THIS OFFICE IS REQUIRED (401-222-2797).

Your environmental consultant is required to be present during all soil excavation to properly conduct the closure assessment. Failure to have a consultant present as required by the UST regulations will result in the cancellation of this approval and rescheduling by this office.

The contractor performing the tank closure may collect samples from the subsurface. **However, please be aware that the samples must immediately be put on ice and stored in accordance with industry standards then transported to a certified lab under proper chain of custody within 24 hours of the time in which they were taken.**

Enclosed you will find a Owner's Verification of Permanent Closure of Underground Storage Tanks(s) form. This form, along with a copy of the UST disposal slip must be completed and returned to Nancy Langlois of this office within seven (7) days of the scheduled tank closure.

You, or your representative, are required to contact the DEM inspector, Sofia Kaczor, on the day of the UST closure for verification. She can be reached at (401) 222-2797, extension 7121.

Sincerely,

Kevin Gillen, Supervising Engineer

VII. DESCRIPTION OF TANK(S) TO BE CLOSED

Tank No.	Age	Date Last Used	Volume	Construction Materials	Stored Material
1	UNK.	UNK.	10K	STEEL	#6
2	UNK.	UNK.	10K	STEEL	#6
3	UNK.	UNK.	1000	STEEL	gasoline
4	UNK.	UNK.	1000	Steel	gasoline

2 tanks do not exist

* If there are more tanks being closed please list on an attachment.

VIII. LOCATION OF TANK(S) (Sketch diagram)

SEE ATTACHED SITE MAP.

IX. CLOSURE INFORMATION

Will tank(s) be excavated, cleaned and disposed of (Rule 13.09)?

YES NO

Specify method of tank cleaning: SCRAPE, RINSE, WASH or,

If circumstances exist which inhibit excavation, you may request a UST Closure In Place. This request is subject to DEM approval. Are you requesting to close tank(s) in place?

YES NO

Owner must submit supporting documentation providing specific details on the necessity to close in place and a detailed diagram must be attached to this application. **Please note: There are additional requirements for determining tank integrity as detailed in the Closure in Place guidelines.**

Specify whether cleaning will take place:

ON-SITE OFF-SITE

If OFF-SITE, indicate location of final tank(s) cleaning (Name & Address):

Will tank(s) be rendered unfit for use and disposed of?

YES NO

If YES, location for final tank(s) disposal: Metals (see attachment)

Will tank(s) be reused?

YES NO

Please note: Reuse of a tank in the ground requires compliance with Rule 10.03 of UST Regulations.

If tank(s) is to be reused, specify:

Proposed use:

N/A

Name & Address of intended user:

Describe the method to be used to empty the tank(s) prior to excavation:

VAC TRUCK

Describe the method to be used to remove the tank(s) from excavation:

EXCAVATION / UNDERLIFT

Describe the method(s) to be used to properly and safely vent the tank(s) and properly make openings in the tank(s):

Venturi blower SYSTEM

Please note: Appropriate venting must be carried out both before the cutting of any tank and before off-site transport of any tank which has not been completely cleaned per Rule 13.09(C) of the UST Regulations.

Describe the instruments used to verify that the tank(s) have been properly vented:

SCOTT SCOUT II 4 gas LEL

Describe how any residues remaining in the tank(s) will be managed:

CONTAINMENT INTO DRUMS - DISPOSAL TO A LICENSED FACILITY

Have these tank(s) ever held non-petroleum, hazardous materials?

YES NO

If yes, please list materials:

Have any of the tank(s) ever contained a product other than that listed in Section VII above?

YES NO

If yes, please list tank # and material stored:

After the closure(s) have been completed on the aforementioned tank(s), will there be any underground storage tank(s) remaining in existence at this facility?

YES NO

Will any new UST(s) be installed on the site?

YES NO

If YES, please note: Prior written approval by DEM is required.

X. WASTE HAULER INFORMATION (if applicable)

Firms transporting tank sludge and waste or tank(s) which require further cleaning must be permitted by DEM, Office of Waste Management, RCRA Section as Hazardous Waste Transporters.

Specify method for disposing of tank sludges or wastes generated by the cleaning process:

Name of Waste Hauler: EMPROSADE
 Address: 100 SELECTION City: Sutton State: MA Zip:
 DEM Waste Hauler Permit #: 676

XI. NOTIFICATION OF LOCAL FIRE DEPARTMENT

The authorized signature of the local fire department below indicates that the local fire officials have been notified that you are planning to close an underground storage tank(s) at the above location. You must also notify the local fire department of the exact closure date after you have confirmed this date with DEM.

[Signature] Date: 7-29-05
 Authorized Local Fire Department Representative
 (Original Signature Is Required)
CRANSTON Phone Number: (401) 461-4161
 Name of Local Fire Department

This signature however, does not serve as notice to the city/town, does not guarantee city/town approval, and does not relieve you of your obligations to other applicable city/town officials. Any violation, deficiency or requirement which may have been overlooked is also subject to correction under the provision of any applicable code.

XII. CERTIFICATION BY TANK OWNER (This section MUST be completed by tank owner)

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. I further certify that records pertaining to the closure will be kept on file by me indicating final destination of residues, etc. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Re: RIDOH Public Records AP21-0728

Dear Sean Rakhshani:

I am writing in response to your request for public records, seeking any records pertaining to “We are requesting any available records relating to environmental or hazardous material releases, spills, violations, enforcement actions, or similar incidents under government agency oversight for the property known as: Parcel Number: 7-0-1 Site Address: 777 Cranston Street, Cranston, RI 02920 Alternate Site Addresses: 829, 833, 849, 851, 855, and 891 Cranston Street, Cranston, RI 02920”

With regard to your request, the Rhode Island Department of Health has no responsive documents.

Further information concerning the APRA may be available through the Attorney General’s website at riag.ri.gov.

Your request also sought information relating to known contaminants/hazardous storage/etc. in the area surrounding this property. The Rhode Island Department of Environmental Management (DEM) maintains a publicly accessible and interactive map that contains address-specific information regarding monitored environmental contaminant sites which you may access at <http://www.dem.ri.gov/maps/> (in the “Environmental Resource Map,” contained in the “Regulated Facilities” layer on the right). Please note that this website is not maintained by RIDOH, so any questions you may have regarding this resource may be directed to the RIDEM contact listed therein.

Thank you for your interest in keeping government open and accountable to the public.

Lila Thapa
Lucky PT Inc.
873 Cranston Street
Cranston, RI 02920

RE: UST Piping Failure

Lucky PT Inc., 873 Cranston Street, Cranston, RI 02920. DEM FAC ID 00653

To Whom it May Concern,

On 8 July 2021 The State of Rhode Island Department of Environmental Management (“DEM”) was notified by the testing company, COMPLIANCE TESTING SERVICES that the Underground Storage Tank (UST) product piping at the subject UST facility appeared to be single walled, and interstitial tightness testing on the product piping was unable to be performed.

DEM records indicate that the following double walled USTs and product piping are installed at the facility:

UST ID	Date Installed	Capacity	Tank Construction	Piping Construction	Product Stored
005	14 December 1999	8,000 gallons	Composite (Steel w/ FRP)	Double Walled	Regular Unleaded Gasoline
006	14 December 1999	4,000 gallons	Composite (Steel w/ FRP)	Double Walled	Premium Unleaded Gasoline

The installation of single-walled piping on UST systems has been prohibited in Rhode Island since 1992. DEM records indicate that double walled product piping was installed at the facility in 1999, and should be capable of having its interstitial space tested for tightness. The tester reported that the interstitial spaces of **the product piping were unable to be tested for tightness, and therefore it is considered a failed test.**

As outlined in Rule 1.10(G)(2)(d) of the Rules and Regulations For Underground Storage Facilities Used For Regulated Substances and Hazardous Materials (250-RICR-140-25-1) (“UST Regulations”) you are required to perform the following actions following a failed interstitial tightness test and a passing primary wall tightness test:

- The failed product piping must be repaired within 30 days;
 - All repairs must be performed by a licensed contractor and must be performed in accordance with the UST Regulations. Repairs must be approved by the Department prior to the start of any work. If you are unable to have a contractor perform the repairs within 30 days, you may submit a temporary variance request. All temporary variance requests must be accompanied

by a signed and fully executed contract with a licensed contractor to perform the required repairs within a reasonable timeframe. Temporary variance requests should be sent to:

Underground Storage Tank Program
Attn: Joseph Cunningham
235 Promenade St.
Providence, RI 02908

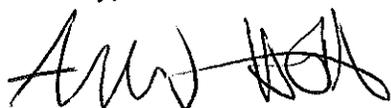

Please be aware that all temporary variances will be subject to prerequisites which include, but are not limited to:

- All required testing, registration fees, and other requirements must be up to date, and the facility must otherwise be in full compliance with the UST Regulations; Any facility which has an active or unresolved Notice of Violation or other enforcement action will not be eligible. Hydrostatic tightness testing on all components that act as containment for the piping that was performed within the previous 3 months.
 - In addition, any facility which has been granted a temporary variance is required to perform additional actions, including, but not limited to, weekly inspections and monitoring of all sumps that act as containment for the product piping by the Class A/B operator, and maintaining a log that is made available to DEM upon request.
- If you choose not to submit a temporary variance request, the variance request is denied, or you fail to repair the component within 30 days, then the follow is required:
 - If any product remains after 30 days, it must be pumped out by a qualified contractor, and the product pipeline and associated UST must be removed from service.
 - The UST serving the failed product pipeline is **ineligible to receive deliveries** and additional product **may not be added** until the pipeline has been repaired or replaced in accordance with the UST Regulations, passed a final tightness test, and demonstrated to be tight
 - The product piping and the associated UST(s) must be taken out of service and put into temporary closure and are prohibited from being used

It may be possible to obtain pasting tests with just the replacement of the boots. Please ask your contractor if this is an option for facility. Please note that any repairs, modifications, or replacement beyond boot replacement of the product piping requires prior review and approval from DEM and must be consistent with the manufacturer's specified repair practices and materials. Any repaired or replaced product piping must be tested using an approved tightness testing method and the facility owner must receive written permission from DEM prior to the facility being released from these requirements.

If you have any questions, please contact me at (401) 222-2797 extension 77144 or via email at andrew.hook@dem.ri.gov.

Sincerely,

Andrew Hook

Re: **OC&I Case No. UST 20-55**
UST Facility ID No. 00653 – LUST Case No. 786
Lucky Mart, 873 Cranston Street, Cranston, Rhode Island

Dear Ms. Thapa:

The above-referenced underground storage tank (“UST”) facility (“Facility”) has been identified by the Rhode Island Department of Environmental Management (“DEM”) as the source of historic petroleum contamination discovered in soil and groundwater samples obtained at and around the Facility, dating back to September 1999.

On 13 January 2003, DEM and John J. Paterra, II, one of the previous owners of the Facility, entered a *Consent Agreement* (copy attached), in which Mr. Paterra agreed to have a qualified environmental consultant fully investigate the nature and extent of the contamination and implement a *Corrective Action Plan* (“CAP”) to eliminate or reduce the contamination to compliant levels. The *Consent Agreement* was recorded in the land evidence records of the City of Cranston on 21 January 2003 and all subsequent owners of the property are subject to its terms and conditions.

On 20 May 2013, DEM issued an *Order of Approval* (copy attached) to Edgewood Services, Inc., the previous owner of the Facility, for a CAP. The *Order of Approval* was recorded in the City of Cranston’s land evidence records on 24 May 2013. Upon information and belief, the CAP was never implemented.

Upon acquiring title to the property on 17 October 2017, LUCKY PT INC became responsible for complying with the terms and conditions of the *Consent Agreement*. By letter dated 6 August 2020, DEM notified LUCKY PT INC that they were required to procure the services of a qualified environment consultant to fully investigate the nature and extent of the petroleum contamination and develop a new CAP proposal for DEM’s review. As of the date of this letter, DEM has not received the required response from LUCKY PT INC.

Please be advised that, pursuant to Sections C(9) through C(15) of the *Consent Agreement* and Parts 1.14(B) and 1.14(C) of the State of Rhode Island's Rules and Regulations for Underground Storage Facilities Used for Regulated Substances and Hazardous Materials (250-RICR-140-25-1), as is or as amended (the "UST Regulations"), LUCKY PT INC is required to comply with the following:

- (1) Within ten days of receipt of this letter, submit to the DEM's Office of Compliance and Inspection ("OC&I") written verification that you have procured the services of a qualified environmental consultant to fully investigate the nature and extent of the existing petroleum contamination, both on and off-site, and develop a CAP.
- (2) Within 30 days of receipt of this letter, your consultant shall submit a written proposal for an initial site investigation that will be completed in full compliance with Part 1.14(H) of the UST Regulations. The proposal shall be submitted to Ms. Lillian Zemba (the "project manager") of the DEM's Office of Land Revitalization and Sustainable Materials Management ("OLR&SMM").
- (3) Within 60 days of receiving the project manager's approval, submit to the OLR&SMM a *Site Investigation Report* ("SIR") that shall be prepared in full compliance with Part 1.14(H) of the UST Regulations.
- (4) Based on the information in the SIR, LUCKY PT INC will be required to have their consultant to develop a new, updated CAP proposal, which shall be prepared in accordance with Part 1.14(I) of the UST Regulations and submitted in accordance with a schedule to be established by the OLR&SMM.
- (5) The new CAP shall be implemented by LUCKY PT INC in accordance with a DEM-approved schedule and an *Order of Approval* issued by the OLR&SMM.
- (6) You shall notify the OLR&SMM's Leaking Underground Storage Tank Program at least 48 hours prior to any excavation, well installation, repair or replacement of equipment at the Facility so that a representative of DEM may be present.
- (7) You shall submit quarterly status reports of all investigatory, sampling, and remedial activities that take place at the Facility.
- (8) LUCKY PT INC shall continue operation of all remediation procedures specified in the CAP and continue submission of required status reports until the Director may determine that the soils and/or groundwater located on and around the Facility have been adequately treated. DEM may require a period of monitoring to ensure that standards have been met. Continue submission of required quarterly status reports until such time that DEM issues written approval for termination of remedial activities at the Facility.

Failure to comply with this letter may result in further enforcement action, which may include the filing of a complaint in Superior Court to enforce the *Consent Agreement*.

If there are any questions or concerns, I may be contacted via telephone at (401) 222 –1360, Ext. 7407, or via electronic mail at tracey.tyrrell@dem.ri.gov. Thank you for your cooperation in this matter.

Sincerely,

Tracey Tyrrell Digitally signed by Tracey Tyrrell

Community

EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the [EJSCREEN home page](#).

Census Block Group EJ Indexes (percentile)	
Particulate Matter (PM 2.5)	80.3
Ozone	84.7
NATA Diesel PM	91.4
NATA Air Toxics Cancer Risk	82.5
NATA Respiratory Hazard Index (HI)	82.2
Traffic Proximity	97.3

Number of EJ Indexes Above 80th Percentile
11

[View EJSCREEN Report](#)

Census Block Group E.J Indexes (percentile)	
Lead Paint Indicator	95.2
National Priority List (NPL) Site Proximity	89.4
Risk Management Plan (RMP) Site Proximity	90.3
Hazardous Waste Proximity	95.2
Wastewater Discharge Proximity	86.8

Demographic Profile of Surrounding Area (3 Miles)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the [DFR Data Dictionary](#).

General Statistics	
Total Persons (U.S. Census)	208,919

United Traction Company Depot and Repair Barn

also known as Cranston Street Trolley Barn, Union Traction (common misnomer)

A huge turn-of-the-century brick barn for trolleys that was later used by the Narragansett Brewing Company for storage & distribution.

ABOUT

Reason for Demolition

A classic case of demolition by neglect. In 2005, the last piece of the now-famous Narragansett Brewery was lost. If only the beer won back it's charm earlier, the building might have been saved and become the site of some sort of brewery operation. A series of suspicious arsons inside the cavernous building set off a series of events where the safest (and easiest, cheapest) thing to do was to take it down.

Timeline of its demise

[Architecture](#) [#ArchiveRI](#) [#NotInRuins](#) [#ThenAndNow](#) <#>

1900

The [United Traction Electric Company](#) builds this as a street car depot and repair shop for its electric trolley fleet. Through a series of merger's and acquisitions, the company will change its name to the Rhode Island Company by 1902. [An earlier account of electric trolleys in the state was written by Scott Molloy](#) .

circa 1918 or 1938 (depending on the source)

Nearby [Narragansett Brewery](#) purchases the building and land. The brewery used it for storage and repair of its delivery fleet. They were the only one in the area to ship with their own cars — with 75 horses, 45 wagons of various types, and electrically propelled and gasoline trucks. It owned 25 refrigerator cars as well. (Breweriana.com, defunct). The Trolley Barn was 108,000 square feet, of brick and cement construction, with a full basement and large wide-open floors.

July 31, 1981

After a successful run, and due to increasing competition from larger national brands, Narragansett Brewing closed it's doors and laid off 350 workers. The larger complex and the Trolley Barn's fate were uncertain.

July 1995

S & P Corporation, the holding company which held Narragansett Brewing Company's assets, sold off 46 tons of brewery equipment and shipped it to China.

October 27, 1998

Decaying buildings and asbestos-ridden equipment and vaults were finally condemned. An excavator rammed its claw-like grapple into the side of the bottling plant. A group of eight other buildings were demolished in the following months. Only the trolley barn was spared for possible redevelopment.

circa 2002-2003

a quaint turn of phrase, or with a slight sneer to the preservation community, the development is called Brewery Parkade.

2003-2004

The City of Cranston officially condemns the building. Paolino Properties enters negotiations with the City of Cranston for developing a new Police Headquarters, possibly on the Trolley Barn site. Janet Zwolinski from Preserve RI starts to talk with Paolino Properties about other options, including the use of Historic Tax Credit to save the structure: "I did originally contact Paolino Properties in April of 2003 and spoke with Allen Peteruto of Brewery Parkade, a subsidiary of Paolino Properties, and was told that if Joseph Paolino, Jr. wanted [Preserve RI's] help, he'd follow up. ...[T]here was no follow up. In subsequent discussions with JP, Jr., I again offered Preserve RI's help in finding a use for the building and was told to direct my efforts to the Governor's office. [...] PRI sent a letter to the Governor, co-signed by our Board Chair, and also to the Director of Administration and to Chair of the State Properties Committee urging them to consider reusing the Trolley Barn as the new home for the Registry of Motor Vehicles."

May 6, 2005

An arson was reported in the Trolley Barn. It was later determined that "teenagers" set fire to pallets in the cement and brick structure. The fire department doused the fire, and although some of the wooden roof and window sills suffered damage, the main structure remained intact. Still, the Barn was declared a public nuisance by the mayor. Janet Zwolinski again: "[Preserve RI] again offer[s] our assistance in finding a new use or new owner for the Trolley Barn. Time is of the essence when dealing with vacant or dilapidated historic properties. Communities need to put pressure on developers to reuse their local landmarks, and not let them sit idle until they become dangerous liabilities. The cost, both monetarily and to our sense of place, is great."

May 31, 2005

The wrecking ball starting to demolish the back of the Trolley Barn (the side furthest away from Route 10). The demolition company used the crumbled brick and concrete to fill the hole. Nothing was reclaimed by the wrecking company, but local laborers

Architecture #ArchiveRI #NotInRuins #ThenAndNow #

Current Events

As of July, 2020, nothing has been built upon this 13 acre site — since the demolition in 2005.

History

National Register Eligible, never listed.

From “Rhode Island Freight Rail Improvement Project: Final Environmental Impact Statement”, January 1998 (Google Books)

This large, two and one half story brick building was built in 1900 by the United Traction Company to house and repair its streetcars. Narragansett Brewery purchased the building in 1918 for use as a warehouse. [...] The building has been determined eligible for listing in the National Register of Historic Places (DMJM/Harris 1993) through consensus between the FRA and the RISHPO. [...] The United Traction property is 6.91 acres in area.

From William H. Jordy et al., [Society of Architectural Historians](#)

Dilapidation does not obscure the impressiveness of this massive brick barn erected for one of the Rhode Island Company's electric trolley lines. Around 1900 industrial buildings associated with emerging electrical technology tended to receive special architectural attention. Such was also the case with the Narragansett Electric Company's slightly later Manchester Street generating plant. There, Neo-Renaissance detail notwithstanding, the treatment anticipated a more modern approach to the industrial structure. Here the image is more archaic — powerfully so, and especially in the spreading central gable with its tiered arching and its rugged cap in rough granite. This feature is slightly stepped from a blunt pinnacle down to corner blocks which the brick wall below receives in the subtle swelling of its upper corners.

The Rhode Island Company's ownership of both the trolley line and the electric company indicates the convenient monopoly it enjoyed. Marsden J. Perry headed both United Traction and the Union Trust Bank in Providence, accounting in part for the fortune that

Architecture #ArchiveRI #NotInRuins #ThenAndNow #

When trolley service declined in the late 1930s, the barn became a warehouse for the Narragansett Brewery, located across the street until its demolition in 1999. One only hopes that the fate of this vast, abandoned barn could be more secure.

From "RHODE ISLAND: An Inventory of Historic Engineering and Industrial Sites", Gary Kulik and Julia C. Bonham, 1978

The United Traction Electric Company built this imposing 2-story, brick-pier building as a street car depot and repair shop only six years after the last horsecars ran in Providence. The building has large blind arches, heavy granite lintels, and intricate corbelling.

United Traction, chartered in New Jersey in 1893, bought out three smaller companies; the Pawtucket Street Railway, the Providence Cable Tramway, and the Union Railroad, the latter originally organized by the Spragues, Cranston textile mill owners, in 1864. Nelson Aldrich, United States Senator from Rhode Island, played a key role in the consolidation. Part of the capital was supplied by the American Sugar Refining Company and since Senator Aldrich had previously sponsored legislation to benefit American Sugar, the press raised serious questions about the propriety of the transaction.

Two years later, an even larger monopoly was created. The newly formed Rhode Island Company not only owned the city's trolley lines, but controlled as well the Providence Gas Company and the Narragansett Electric Lighting Company. In 1906, following the pattern of increasing monopoly control especially evident in this period, J. P. Morgan's New Haven Railroad bought out the Rhode Island Company. With the national demise of urban trolley lines, the Narragansett Brewery bought the depot about 1938 and converted it to use as a warehouse. Some street car tracks are still in place inside, though most of the original equipment and fittings have been removed.

In the News

Cranston's old trolley barn getting a high tech occupant

by K. Alexa Mavromatis

Providence Business News (PBN) | October 9, 2000

Architecture #ArchiveRI #NotInRuins #ThenAndNow #

Broadband last week announced it will headquarter its Rhode Island operations in Cranston, in the former warehouse (and before that, a trolley barn) that has sat idle for nearly... (truncated due to pay wall. As far as we know, this deal never completed.)

13 ANECDOTES

66 Somewhere along the line (not sure when) the name of the current strip mall got changed from “Brewery Parkade” to “Cranston Parkade”. So even that small homage to Narragansett Brewing Co. was eliminated.

— Miguel

DECEMBER 30, 2015

66 People are calling this building a “trolley barn.” but it was much more than just a storage building for streetcars. Until the late 1930s this building and its grounds comprised the primary repair shops (called Cranston Repair Shops) for the Rhode Island Company, the electric railway company that operated over 400 miles of electric railway tracks in Rhode Island until just after WW I.

At its height, besides the Providence, Pawtucket and Woonsocket local lines, the RI Co operated the following suburban streetcar lines: Woonsocket to Pascoag, a high-speed line to Providence from Woonsocket and slow speed (i.e., side of the road) line to Pawtucket; a high-speed line from Providence to Warwick neck, Rocky Point and Buttonwoods; a long line to Narragansett Pier and Wakefield via East Greenwich (Seaview RR); the long line to Rockland and on to Danielson, Connecticut; and lines to Artic and on to Hope and Washington via Crompton.

In the early 1920s RICo reorganized as United Electric Railways and operated the streetcars in RI until the last streetcar line was abandoned in 1948. During the 1920s and 30s UER abandoned most of the suburban/interurban trolley lines except for a handful of Providence local lines and the North Main Street line to Pawtucket.

In the late 1930s UER had cut back so much that they no longer needed such a large shop complex. So they vacated their Cranston repair shops and did what heavy repairs needed at their Broad Street carhouse, Elmwood carhouse and the Prairie Avenue carhouse. They sold the shops building and land in the back to the brewery which then used it as a storage warehouse.

I believe that the Elmwood carhouse still exists as does the Cranston Street carhouse and the Academy Avenue carhouse. There might be another one or two of

DECEMBER 19, 2008

“ When I first moved to Cranston back in 1990, I had explored the grounds of the Brewery, but never once set foot in the Trolley Barn; it was impenetrable at the time. As I grew older and the old Brewery demolished, I once saw from my vehicle on Cranston St, behind an overgrowing shrub, a sheet of plywood had been removed from one of the tall windows, allowing easy access. I thought about it, but never acted on the attempt to explore. Shame on me! I'd give anything to go back! Thanks for the great pics!!

— *Pat S*

AUGUST 24, 2008

“ I grew up in Cranston, my dad drove a truck for B&B transportation, who hauled for the brewery. I haven't been “home” in years, and these pictures of the decaying barn made me cry a little. It was such a wonderful building. There used to be tunnels that lead to the brewery across the street. This was so they could send the beer on conveyor belts to be loaded on horse drawn carts – many many years ago, and not be seen because, according to my dad, The Internal Revenue Service granted the brewery a permit to brew, bottle and sell beer and malt liquor for medicinal purposes during Prohibition. The beer had to be sold on the brewery's premises. Sales could be in a quantity of one gallon at a time and a prescription was required. So, they would bring the beer under ground and load it onto “ice trucks” to be delivered, illegally, else where.

— *Alicia Clark*

“ Brilliant work folks. You should be commended for preserving the memories of these venerable historical structures. They are the old Rhode Island, the community where people lived, prayed, worked, and passed from this life. All we have now is the bloodsucking Paolinos who care only about money as they buy and sell in a satanic enterprise which will leave nothing more than a Kafka-esque nightmarish monochrome kalaidoscope of prefabricated upscale housing and further

“ I am grateful to all of you who havw entered your thoughts here and on the other sites linked to this site. I am an avid researcher of historical facts, and the one thing that bothers me is that more people do not regard history as a foundation of our present but they regard history more as just a stepping stone to bigger and “better” things. While I will admit that an electric mixer makes whipping potatoes a lot easier, I still enjoy using and old fashioned crank drive mixer my grandmother use to use. Why must we destroy the Mom and Pop corner store so that mass retailers like Walmart and Stop and Shop can build over sized, intimidating gargantuan buildings which just take up more and more open space. The site of the Main building of the Narragansett Brewery (Lets not forget that at one time there was also a race track where car manufacturers would bring their newest models and race for bragging rights.) which now houses a shopping center with Stop and Shop and Kmart as the anchor stores, could have had so much more to offer. How about a museum of work and culture similar to that in the northern part of the state which could have paid homage to those who made the Narragansett Brewery an icon for Rhode Island, which could have been the central focal point of a new state park with athletic facilities and walking tracks. But the almighty dollar and the dollar signs in the eyes of J. Paolino take precedent. I realize that I may be rambling on but my dismay and distaste for people who have no regard for history and feel that we should shun the past and only support a future which cuts all ties to our past gets the best of me. I hope that we do not someday have to once again learn how to build a world from soil and trees, rather I would prefer to learn how those that did before us did it and try to maintain what they have given us instead of tearing it down. (one last note: It is land owners like J. Paolino who cause great historical landmarks such as the Brewery to fall into disrepair and allow them to get into a state of no return.)

(**A.I.R.:** Thanks for the info, Steve. Just a slight correction, the former site of the Narragansett Brewery is not the site of the current Cranston Parkade [KMart, Lowes, etc...]. That land was undeveloped until about 2000 — we checked via aerial photos.)

— Steve Micke

“ My grandfather worked there for 40 years. He’s 94 now and I still ask for stories of the old days at Narragansett brewery. When he had to move from his local residence 10 years ago, I asked to keep old wooden crates that were used and beer cases before

“ J. Paolino Jr. is a liar of the worst kind. His m.o. is greed.

— *CD*

“ They may have torn down the brewery, but we’re bringing the beer back!

narragansettbeer.com

— *Mark Hellendrung*

“ I had the privilege to explore this place when it was used as a warehouse by the brewery. I’m in advertising, and produced the last TV commercial ever shot for Narragansett Beer in 1983. It happend that we needed Narragansett Beer bar glasses for the commercial, and John MacNabo (sp), the brewery president, took me into the barn where they stored all the beer advertising paraphenalia. It was pretty cavernous, and most of it was unused by then. We took the last 8 gold-rimmed Narragansett beer glasses out of that place, and used them for the shoot. I still have 4 of them.

We used to meet regularly in the main brewery building, in the BrewMaster’s room, which was an ornate, dark-panelled Germanesque room with a large, leather-covered conference room table in the center. At one end of the oval table, 3 draught handles stood at attention. You had your choice (yes, even at a 9 am meeting) of fresh-tapped Narragansett Lager, porter (which was really good), or ale. It’s a shame the whole place wasn’t put on the national register. It was a real piece of history.

— *Dan Sheppard*

“ Why do we tie our emotions so tightly to the buildings and landmarks of our past?

Because our past is what makes us New Englanders.

We ache inside to see this decaying trolley barn come down because no one cared enough to preserve our past, to remember that new is not always the best and to remind us that our existence in life has so little meaning to our unknown neighbors.

Mention the pyramid structure of the Apex building in Pawtucket and a few hundred thousand people will nod in unison.

Does everyone remember that commercial in the 70’s where it shows an Indian with a tear running down his face and as the camera backs away it shows a polluted stream? Our waterways are now cleaner because of the EPA and Superfund money. We need to have that Indian make the same commercial next to the trollev barn as it’s

“ Some friends and I filmed a short movie in the brewery a few years back, ping pong club it was called. While we were in there, some little punks were screaming at us and tagging their shitty scriggles over some amazing graffitti on the walls. Man those kids sucked.

Anyways, we had a ping pong table set up for the film, and one of the kids comes stumbling into the room we were in during filming and collapses on the table. He had a broken wrist, so that the back of his hand could bend all the way back to his arm. Man, I hate to say he had it coming, but— Anyways, he had fallen like 30 feet inside. Not through rotting floor or anything, just being careless. His friends wanted to run away, the little pansies. But we made them call for an ambulance, and firemen came with the ambulance.

We were going to high tail it out of there, but one of the girls in our group knew the fireman or something, so they werent pissed at us for being in there. When we saw that kid again he wouldnt talk to us. What a lil shit!

— *Than*

“ I am a 12 year old urban explorer who lives in Cranston and is SHOCKED to hear that this place is coming down in May 2005, to make room for a new police center. I have visited this building several times and even seen the interior. The archetexture is very intricate in the brickwork and as much as it is indeed decaying, it is an amazing place. My dad tells us how he used to be able to take tours of the brewery complex and how my late grandfather used to enjoy ‘Gansett Beer. All I can say is farewell and bon voyage to this landmark.

— *AJM*

The MIS-DEIS-Draft 4(f) for this project presented and evaluated various alternatives for providing improved freight rail access between Quonset Davisville Industrial Park in North Kingstown and Boston Switch in Pawtucket, RI. The Draft document was approved on February 29, 1996, and a public hearing followed on April 11, 1996. Following receipt of comments, a preferred alternative was selected for further evaluation in the Final EIS (FEIS). The FEIS presents the results of additional analyses, the reasons for the selection of the preferred alternative, and responds to oral and written comments submitted MIS-DEIS-Draft 4(f). Also included is a Final Section 4(f) Evaluation concerning historic resources.

Comments on the FEIS are due by March 16, 1998 and should be sent to the following individuals at the addresses presented above.

FHWA
Mr. Gordon G. Hoxie
Division Administrator

RIDOT
Mr. Peter M. Janaros, P.E.
Project Manager

The following is a description and discussion of the impacts to the affected Section 4(f) resources.

5.1 Wellington Avenue/Pawtuxet River Bridge

The Wellington Avenue/Pawtuxet River Bridge (Figure 2) is a steel double-intersection, Warren through-truss bridge with substruts supported by cut stone abutments. All principle connections of the bridge are riveted with the exception of the pinned joints above the four corner bearing points.

In 1905, during a period marked by extensive upgrading of its branch lines, the New York, New Haven & Hartford Railroad (NYNH&H) Stonington division contracted the American Bridge Company of Trenton, New Jersey to construct the Wellington Avenue/Pawtuxet River Bridge. The truss pattern and construction of the present bridge are typical of early twentieth-century bridge technology. These bridge types were, at one time, well-represented in the extensive system of the NYNH&H Railroad. As a component of an extensive railway transportation system, this bridge reflects the broad need for stronger, more rigid railroad spans to handle the heavier locomotives of the early-twentieth century.

This bridge stands out as a relatively early, and highly-intact example of a double-loaded, double-intersection, Warren through-truss bridge that carries both tracks of the railroad. It is one of only four fixed, through-truss railroad bridges remaining in Rhode Island. Another notable example of this type of bridge is the Omega Pond Railroad Bridge built thirteen years later in East Providence. However, the Wellington Avenue/Pawtuxet River Bridge differs from the Omega Pond Bridge in that it has stronger, deeper floor beams and sits directly on its stone abutments without concrete seating layers and metal shims, which are found in the East Providence structure. In addition, unlike the Omega Pond Bridge, which carried one direction of the rail traffic, the Wellington/Pawtuxet River Bridge is a more substantial bridge that carries two sets of railway tracks. The bridge has undergone minor structural repairs, but otherwise has had few alterations (DMJM/Harris 1993, FRH 1996). The bridge was determined eligible for listing in the National Register of Historic Places through consensus between the RISHPO and the Federal Highway Administration.

5.2 United Traction Depot and Repair Shop (Narragansett Brewery)

This large, two-and-one-half story brick building was built in 1900 by the United Traction Company to house and repair its streetcars. Narragansett Brewery purchased the building in 1918 for use as a warehouse. The property is located at 833 Cranston Street on the Northside, adjacent to the rail line (Figure 3). The building has been determined eligible for listing in the National Register of Historic Places (DMJM/Harris 1993) through consensus between the FRA and the RISHPO.

be the largest firm in the world exclusively devoted to building winding machinery. The 3-story, brick-pier buildings, with windows running pier to pier, still stand on Elmwood Avenue. The company changed its name to Leeson in 1959, which is a derivation of the name of Joseph Leeson who founded and owned the company for many years. It moved to Warwick, Rhode Island in 1962. The original buildings are now divided among tenants.

Transportation

RHODE ISLAND COMPANY TROLLEY BARN (1912) Providence
1160 Cranston Street 19.296400.4629580
Cranston Providence

This trolley barn was built by William H. Hamlyn & Son of Providence from designs by H. H. Bronsdon, chief engineer of the Rhode Island Company. It was built to supplement the company's 1900 depot and repair shop (see below). It is a 2-story, brick building, 400' X 200', constructed on a concrete foundation. Originally serving as an operating trolley barn and light repair shop, it had a capacity for 96 40-foot trolley cars on twelve tracks. The cars entered the barn through huge openings in the southern wall. The pit room, 150' X 200', was constructed to allow repair crews to work under the cars. The repair shop, 120' X 20', housed a traveling crane, the tracks of which are still in place. The original repair pits have been covered and the south facade sheathed in aluminum. The building is now used by a company which manufactures centrifugal pumps and heating equipment.

(Board of Trade Journal, Providence, October 1912.)

UNITED TRACTION DEPOT & REPAIR SHOP (1900) Providence
Cranston Street 19.297100.4630580
opposite Narragansett Brewery Providence
Cranston

The United Traction & Electric Company built this imposing 2-story, brick-pier building as a street car depot and repair shop only six years after the last horsecars ran in Providence. The building has large blind arches, heavy granite lintels, and intricate corbelling. United Traction, chartered in

New Jersey in 1893, bought out three smaller companies; the Pawtucket Street Railway, the Providence Cable Tramway, and the Union Railroad, the latter originally organized by the Spragues, Cranston textile mill owners, in 1864. Nelson Aldrich, United States Senator from Rhode Island, played a key role in the consolidation. Part of the capital was supplied by the American Sugar Refining Company and since Senator Aldrich had previously sponsored legislation to benefit American Sugar, the press raised serious questions about the propriety of the transaction. Two years later, an even larger monopoly was created. The newly formed Rhode Island Company not only owned the city's trolley lines, but controlled as well the Providence Gas Company and the Narragansett Electric Lighting Company. In 1906, following the pattern of increasing monopoly control especially evident in this period, J. P. Morgan's New Haven Railroad bought out the Rhode Island Company. With the national demise of urban trolley lines, the Narragansett Brewery bought the depot about 1938 and converted it to use as a warehouse. Some street car tracks are still in place inside, though most of the original equipment and fittings have been removed.

(Scott Molloy, Division 618: Streetcar Employees Fight for a Union in Rhode Island, Providence, 1977.)

Bridges

ELMWOOD AVENUE BRIDGE (1918)	Providence
Elmwood Avenue	19.298370.4625930
Cranston-Warwick	Providence

This 3-span, reinforced-concrete deck-arch bridge, 153 feet long and 53 feet wide, carries Elmwood Avenue across the Pawtuxet River. Designed by C. L. Hussey and built in 1918, it was a model for many later state bridges. The bridge was widened in 1931.

9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the property?	<input checked="" type="radio"/> Yes No Unk	Yes No Unk	See October 2005 RAWP. Two 1,000-gallon gasoline USTs and two fuel oil USTs all of which were removed.
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed grounds on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	

Question	Owner	Occupant (if applicable)	Explain in detail any "Yes" answers. (use extra sheet if necessary)
13a. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
13b. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environment health agency?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
14. Does the owner or occupant of the property have any knowledge of environmental liens or government notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	
15a. Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	<input checked="" type="radio"/> Yes No Unk	Yes No Unk	Property owner is aware of the past existence of hazardous substances or petroleum products.
15b. Has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	No hazardous or petroleum products currently exist at the Site. The Site is vacant.
15c. Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	Not aware of any past environmental violations.

Question	Owner	Occupant (if applicable)	Explain in detail any "Yes" answers. (use extra sheet if necessary)
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes <input checked="" type="radio"/> No Unk	Yes No Unk	See October 2005 RAWP.
17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes <input type="radio"/> <input checked="" type="radio"/> No Unk	Yes No Unk	
18a. Does the property discharge waste-water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	Yes <input type="radio"/> <input checked="" type="radio"/> No Unk	Yes No Unk	
18b. Does the property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a sanitary sewer system?	Yes <input type="radio"/> <input checked="" type="radio"/> No Unk	Yes No Unk	
19. Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?	Yes <input type="radio"/> <input checked="" type="radio"/> No Unk	Yes No Unk	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes <input type="radio"/> <input checked="" type="radio"/> No Unk	Yes No Unk	

Additional information requested from Report User (check and attach as applicable/available):

- Environmental cleanup liens that are filed or recorded against the subject property.
- Activity and land use limitations that are in place against the subject property or filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for Landowner Liability Protections (other than the items listed above, relevant to environmental issues).
- Actual knowledge of the User (other than the items listed above, relevant to environmental issues).
- Relationship of the purchase price to the fair market value of the subject property if it were not contaminated.
- Commonly known or reasonably ascertainable information about the subject property (other than the items listed above, relevant to environmental issues).
- The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation.
- Previous environmental or engineering reports available for the subject property.

**Re: Former Narragansett Brewery Facility
Cranston Street & Garfield Avenue, Cranston RI
CMG ID 2005-105**

Dear Mr. Crawford:

At your request, CMG Environmental Services, Inc. is submitting this letter on behalf of CP Associates, LLC and Trolley Barn Associates, LLC to describe upcoming activities we wish to implement at the former Narragansett Brewery facility in Cranston, Rhode Island (the Site).

The Site consists of two parcels of land, divided by Cranston Street, that were part of the former Narragansett Brewery facility where soils are impacted with polynuclear aromatic hydrocarbons (PAHs), lead, and arsenic. Excavation for the foundation of the new Cranston Police Headquarters at the Brewery Parcel (on the southern side of Cranston Street, see attached Figure 1) displaced approximately 3,500 cubic yards of PAH- and metals-impacted soil (Stockpiles A & B, see Figure 2) and approximately 4,500 cubic yards of cleaner material (Stockpile C, see Figure 2) which was stockpiled at the Trolley Barn Parcel (on the northern side of Cranston Street) in accordance with the October 31, 2006 Remedial Action Work Plans (RAWPs) we prepared for each parcel.

The RAWP we prepared for the Trolley Barn Parcel called for spreading and capping (with asphalt, two feet of clean fill, and/or high visibility geofabric with one foot of clean fill) of this relocated impacted soil from the Brewery parcel as part of planned development of the Trolley Barn Parcel. As we recently discussed, the previous development plans for the Trolley Barn Parcel (a new Registry of Motor Vehicles) are no longer going forward. As a result, full capping of impacted soils at the Trolley Barn Parcel needs to be placed on hold until new development plans can be made and implemented. In order secure the Trolley Barn parcel in the interim, CMG proposes spreading the impacted soil from the Brewery Parcel across the central and northern portion of the Trolley Barn parcel (as shown on Figure 2) where we completed test pits and obtained soil analytical data indicating impact consistent with that present in the impacted soil from the Brewery Parcel. After spreading Stockpiles A & B (to an average thickness of 1.5 feet), CMG will collect point of compliance soil samples from the spread material (one for every 500 cubic yards). A layer of high-visibility geofabric will be placed over the spread Brewery Parcel soil and then covered with at least one foot of Stockpile C soil. After spreading and capping of the Brewery Parcel soil is complete, hydro-seed will be spread across the entire Trolley Barn

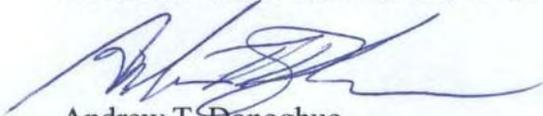

600 CHARLTON STREET, SOUTHBRIDGE, MA 01550
PHONE (508) 765-8510
FAX (508) 765-8515

parcel and the fence surrounding the Trolley Barn Parcel will be inspected and repaired where necessary to control access to this parcel. We will photo-document these activities and provide plans signed and stamped by a Rhode Island professional engineer showing the final layout the relocated soils (including cross-sections of the relocated and capped soils). Capping of the remaining portions of the Trolley Barn parcel will be included in future development plans for the Trolley Barn parcel.

Construction of the new Cranston Police Headquarters at the Brewery Parcel is nearing completion. Most of this Parcel will be covered with asphalt pavement and effectively capped as proposed in the RAWP. Planned areas of landscaping also need to be capped in accordance with the RAWP for this parcel. For the landscaped areas (less than 10 percent of Brewery Parcel), a layer of high-visibility geofabric will be placed down and overlain with at least one foot of clean fill as proposed in the RAWP. CMG will photo-document these activities, collect samples of clean fill brought in for the one foot of cover, and submit the samples for laboratory analysis of PAHs and eight Resource Conservation and Recovery Act metals in accordance with the Brewery Parcel RAWP. Following the completion of capping activities at the Brewery Parcel, CMG will prepare and submit to RIDEM a Remedial Action Closure Report, draft Environmental Land Use Restriction, and Soil Management Plan.

Since winter is approaching, CMG respectfully requests approval to proceed with the above activities as soon as possible. Please feel to call us at 508-765-8510 if you have questions or if comments.

Sincerely,
CMG ENVIRONMENTAL, INC.

Andrew T. Donoghue
Senior Project Manager

APPENDICES

Appendix A – Supporting Documentation

1.0 INTRODUCTION [RULE 9.01]

CMG Environmental Services, Inc. (CMG) has prepared this Remedial Action Work Plan (RAWP) for the portion of the former Narragansett Brewery/Falstaff Brewing Company facility (former Narragansett facility) located on the northern side of Cranston Street in Cranston, Rhode Island (the Site) on behalf Trolley Barn Associates, LLC (the owner of the Site). The purpose of this RAWP is to propose the relocation of soils impacted by polynuclear aromatic hydrocarbons (PAHs) and metals from the portion of the former Narragansett facility located immediately south of the Site across Cranston Street to the rear two thirds of the Site. Portions of the Narragansett brewery plant formerly occupied this southerly adjacent parcel (referred to hereafter as the Brewery Parcel), which consists of approximately 3.58 acres of land at the corner of Garfield Street and Cranston Street. The Brewery Parcel portion of the former Narragansett facility is currently vacant and slated for redevelopment as the location of a new police headquarters for the City of Cranston. This redevelopment will result in the displacement of approximately 9,400 cubic yards of soil at the Brewer Parcel to accommodate new building foundations and infrastructure improvement.

1.1 PURPOSE

CMG prepared this RAWP to meet the applicable performance standards as set forth by the Rhode Island Department of Environmental Management (DEM) at Rule 9.0 of the “Rules and Regulations for the Investigation and Remediation of Hazardous Materials Releases” dated March 31, 1993, as amended August 1996 and in February 2004 (the Remediation Regulations).

1.2 SITE LOCATION, DESCRIPTION, & HISTORY

The Site is a 6.91-acre, irregularly shaped parcel of land located at 891 Cranston Street in Cranston, Rhode Island, directory north of the intersection of Garfield Street and Cranston Street and the Brewery Parcel. Currently vacant, development of the Site initially occurred circa 1900 with the construction of a 113,000-square foot brick building (the Trolley Barn) used between 1930 and 1935 as a repair and maintenance shop for the electric trolley system that formerly served the City of Cranston. The Site is bounded by former railroad bed for the New York, New Haven, & Hartford Railroad (now owned by the State of Rhode Island) to the west, the rail lines of the National Railroad Passenger Corporation (Amtrak) to the north and east, and Cranston Street to the south.

According to a June 1990 “Phase I Environmental Site Assessment” (ESA) completed for the Site by Paragon Environmental Services, Inc. of Norwood, Massachusetts, Liberty Real Estate & Investment Corporation purchased the Site in 1936 and leased portions of the Site out to various entities. Between 1936 and 1965, entities leasing portions of the Site included: a filling station (between 1934 and 1939), two sign companies, a bus company, and a trucking company. The Narragansett Brewery Company began leasing portions of the Trolley Barn in 1950, eventually taking over the entire Site by 1965, when the Falstaff Brewing Corporation (Falstaff) purchased the Site and the rest of the former Narragansett facility and properties located to the south, directly across Cranston Street. Narragansett and Falstaff used the Site for warehousing, distribution, bottling, and labeling until Falstaff permanently shut down operations at the former Narragansett facility in 1981. Both the Site and the Brewer Parcel have remained vacant since 1981. Demolition of buildings on the Brewery Parcel occurred in 1998 and 1999, and demolition

of the Trolley Barn occurred in May 2005 after an arson fire damaged the building beyond repair.

1.3 SCOPE OF SERVICES

Rule 9.0 of the Remediation Regulations requires that a RAWP must contain a description of the remedial action that will be implemented at the Site.

In a separate RAWP for the Brewery Parcel that we are submitting concurrently with this RAWP, CMG proposes the excavation of approximately 9,400 cubic yards of soil from the proposed 20,000-square foot Cranston Police Headquarters building, down to a depth of approximately 15 feet below the existing grade. As excavation activities proceed, CMG proposes relocating the soil to the Site, which historically was the northernmost portion of the former Narragansett Brewery facility.

To complete the relocation, CMG anticipates moving the soil via dump trailers directly across Cranston Street (i.e., the trucks will cross Cranston Street but not travel along Cranston Street) from the Brewery Parcel to the Site (a tunnel running underneath Cranston Street connects the two properties, but is not likely a feasible route of soil transfer due to logistical and safety concerns). During excavation, transfer, and grading operations at both locations, a water truck will be available to provide dust control as needed.

The DiGregorio Corporation of Smithfield, Rhode Island will deposit the soils from the Brewery Parcel in the rear two thirds of the Site to raise and level the existing grade. Current plans by CP Associates, LLC (the owner of the Brewery Parcel) and Trolley Barn Associates, LLC (owner of the Site) calls for raising the grade of the rear two thirds of the Site generally between 4 and 6 feet above the existing grade. Soil from the Brewery Parcel would account for approximately the first 1.5-foot rise in grade, with an overlying layer of clean fill accounting for the remaining rise in grade (e.g., roughly 2.5 to 4.5 feet). CMG anticipates a minimum of two feet of clean fill overlying the Brewery Parcel soils in all areas; however, we propose a covering layer of high-visibility geotextile fabric overlain by at least one foot of clean fill for landscaped area having less than two feet of clean fill.

2.0 PREVIOUS INVESTIGATIONS

2.1 JUNE 30, 1999 "PHASE I ENVIRONMENTAL SITE ASSESSMENT" BY PARAGON

The Paragon ESA identified the Site a historically commercial/industrial property as described in Section 1.2. According to the Paragon ESA, Cranston Fire Department records for the Site included a permit issued in 1934 for a gasoline station and two 1,000-gallon underground storage tanks (USTs). Paragon also indicated that two fuel oil USTs (reportedly removed in 1992 or 1993) were formerly located north of the Trolley Barn and supplied fuel to the building's heating system prior to installation of a natural gas-fired heating system. CMG opines, based on the age of the former Trolley Barn, that a coal-fired heating system likely serviced the building prior to the oil-fired system. Paragon's recommendations included a ground-penetrating radar survey to identify possible USTs at the Site and a subsurface investigation if past Site use, including past underground petroleum storage, had impacted soil or groundwater at the Site.

2.2 DECEMBER 18, 2000 LIMITED SUBSURFACE INVESTIGATION (LSI) BY PARAGON

Paragon conducted an LSI at the Site that included a geophysical survey (by Hager-Richter Geo-Science, Inc. of Salem, New Hampshire [HRG]), the advancement of four soils borings (PSB-1 through PSB-4) and six borings completed as groundwater monitoring wells (PES-1 through

PES-6). On September 29, 2000, Paragon located the borings and monitoring wells (installed via two drill rigs operated by American Drilling of Westminister, Massachusetts) to provide general coverage of the property and assess areas of concern (primarily possible former UST locations and subsurface anomalies) identified in their ESA and during September 25, 2000 geophysical survey activities by HRG (which covered approximately 85 percent of the exterior portions of the Site). Paragon field-screened soil sample from each boring/monitoring well location for total organic vapors (TOV) using a photoionization detector. The results of PID screening did not indicate any significant TOV readings, which ranged from 0.0-0.2 parts-per-million by volume (ppmv). During drilling activities, CMG observed Site soils to consist primarily of fine-, medium-, and coarse-grained sand with apparent fill in some locations, including the presence of coal dust and coal fragments at drilling location PES-4.

On October 6, 2000, Paragon collected groundwater samples from monitoring wells PES-1 through PES-6 and submitted samples from all monitoring wells for laboratory analysis of volatile organic compounds (VOCs) by EPA Method 8260 and total petroleum hydrocarbons (TPH) by EPA Method 8015-modified and monitoring wells PES-3, PES-4, and PES-5 for PAHs by EPA Method 8270 and eight dissolved Resource Conservation and Recovery Act (RCRA8) metals. Results of these analyses indicated the presence of trace levels of benzene (0.009 mg/L), toluene (0.032 mg/L), ethylbenzene (0.001 mg/L), xylenes (0.02 mg/L), and methyl tertiary butyl ether (MTBE, 0.004 mg/L) in monitoring well PES-1 and chloroform (0.002 mg/L) in PES-5. Paragon reported the laboratory analyses did not identify any other analytes at or above laboratory method detection limits.

Paragon conducted a level survey of monitoring well locations and gauged the depth to groundwater at each to assess groundwater flow at the Site. Based on relative groundwater elevation data across the Site, Paragon inferred a northerly groundwater flow direction. Paragon located PES-1 in the suspected location a 1930s-era filling station. However, Paragon concluded that the presence of MTBE (introduced in 1979, became widely used in gasoline in the mid-1980s) suggested a more recent, off-Site source of VOCs in PES-1, located on the upgradient end of the Site. Paragon suggested the Food N' Fuel gasoline station located southwest (cross-/upgradient of the Site on Cranston Street) as a possible source. Appendix A presents a copy of the December 18, 2000 LSI report prepared by Paragon.

2.3 OCTOBER 2005 UST CLOSURE ASSESSMENT REPORT BY CLEAN ENVIRONMENT, INC.

During demolition of the Trolley Barn following the May 2005 fire, construction personnel discovered two approximately 1,000-gallon steel USTs located near the western wall of the former Trolley Barn building. Trolley Barn Associates, LLC retained Clean Environmental, Inc. (CEI) of Providence, Rhode Island supervise the removal of the USTs and assess for environmental impact.

CEI documented the removal of the USTs in their October 2005 "UST Closure Assessment Report, The Trolley Barn, 891 Cranston Street, Cranston, RI," (UST Closure Report). CEI indicated that both USTs were of single-wall steel construction with heavy corrosion and numerous holes. CEI reported that the USTs were for gasoline in the past. They reported that both tanks were empty and in such poor condition that they were removed in pieces. CEI did not report observing any evidence of impact to soils surrounding the USTs and indicated that TOV readings from soils around and underneath the USTs did not exhibit TOV readings exceeding 1 ppmv. CEI collected a soil sample from the bottom of the UST and submitted it for laboratory

analysis of VOCs via EPA 8260. Results of this analysis indicated the presence of toluene at 0.039 mg/Kg, well below the Method 1 Residential and applicable Industrial/Commercial Direct Exposure Criteria and the applicable GB Leachability criteria of 54 mg/Kg. CEI concluded that “no further investigation of the Site is warranted at this time.” Appendix A presents a copy of the CEI UST Closure Report.

CMG notes that groundwater analytical data for Site monitoring wells PES-3 and PES-4, which appear located downgradient of the UST locations (as indicated by CEI), did not identify any petroleum or VOC impacted groundwater.

3.0 REMEDIAL OBJECTIVES [RULE 9.02]

The objective of this RAWP is to control potential future exposure to PAH, lead, and arsenic contaminated soil at the Site. CMG opines that current development plans for the Site, coupled with an ELUR will achieve this objective. The intended development of the Site includes the construction of a new building on the front one third of the Site along Cranston Street and asphalt paved parking, drives, and loading areas over the rear two thirds of the Site. Development plans also included raising the existing grade between four and six feet over the rear two thirds of the Site, using soils from the Brewery Parcel excavated for the new police headquarters overlain by 2.5-4.5 feet of clean fill in most areas. The figures section of this RAWP includes a schematic (SK-1, “Existing and Prop Grades”) showing the existing and proposed grades for the Site.

Given the commercial and industrial use of the Site in the past, the age of the former Trolley Barn (constructed in 1900 when coal would have been the fuel source for such a building), that it was part of the former Narragansett facility beginning in 1950, the observed presence of abandoned rail lines, and observation of coal and coal dusts in soils at least one location, CMG opines that common urban contaminants of concern (COCs) such as PAHs and metals comparable to those present at the Brewery Parcel (and other portions of the former Narragansett facility) are likely present in surficial soils at the Site. Existing data indicates only trace levels of OHM impact (gasoline-related VOCs) in a single monitoring well located on the upgradient end of the Site.

3.1 GROUNDWATER OBJECTIVES [RULE 9.02A]

Based on existing groundwater analytical data, the low solubility/mobility of the contaminants of concern (COCs) and the depth to groundwater (approximately 23-36 feet below grade at the Site, CMG opines that potential COC impacts are highly unlikely to impact groundwater at the Site, and that the development of Method 2 GB Groundwater and soil Leachability Objectives (DEM has not established Method 1 GB standards for any of the COCs) is unnecessary.

3.2 SURFACE WATER & SEDIMENT OBJECTIVES [RULE 9.02B]

Tongue Pond, located 1,200 feet south of the Site, is the nearest surface water body to the Site. Surface runoff site is likely to the north at the Site, away from Tongue Pond. Based on this, we do not consider the development of surface water and sediment objectives warranted or practical since surface water is not an impacted media.

3.3 SOIL OBJECTIVES [RULE 9.02C]

CMG opines that likely existing levels of PAHs and metals and the levels present in the Brewery Parcel soils will not pose any significant risk to human health or the environment as long as future Site development limits the potential for direct exposure to short periods for Site workers only. If required by DEM, CMG will conduct a Method 3 Risk Characterization for the Site. In conducting our Method 3 Risk Characterization, we will base our assessment of risk on the characteristics of the primary COCs, the isolation of contaminated soil from human exposure under the proposed improvements to the Site, the classification of groundwater at the Site and surrounding area as GB, and the implementation of an ELUR.

3.4 AIR OBJECTIVES [RULE 9.02D]

The post-construction, long-term remedial objective associated with air quality is to mitigate against airborne migration of PAHs and metals through isolation underneath building footprints, asphalt & concrete surfaces, an up to 4.5 feet of clean fill (but not less than 2 feet in unpaved areas, or alternatively, a highly visible layer of geotextile fabric overlain by at least one foot of clean fill). In order to prevent the creation of dust during planned construction, CMG proposes the wetting of exposed Site soils as necessary. As it arrives, DiGregorio will spread, compact (if necessary), and then cover the Brewery Parcel soils with clean fill.

3.5 ESTIMATED PROJECT SCHEDULE

CMG anticipates that CP Associates will complete relocation of soils from the Brewery Parcel to the Site portion of the former Narragansett facility within the next 60 days, pending DEM approval of this plan and the separate RAWP for the Brewery Parcel, which we are submitting concurrently with this plan. Once the relocation is complete, the Brewery Parcel soils covered with clean fill, and grading activities complete, Trolley Barn Associates, LLC will record the an ELUR on the deed for the Site specifying necessary restrictions on future Site activities to prevent or minimize exposure to impacted soils.

4.0 PROPOSED REMEDY [RULE 9.03]

CMG proposes relocating approximately 9,400 cubic yards of Brewery Parcel soils to the Site for use as grading material across the rear two thirds of the Site and covering it with clean fill. CMG also proposes isolating any potentially COC-impacted Site soils and COC-impacted Brewery Parcel soils underneath pavement and or clean fill (with no less than 2 foot of clean fill or a layer of high visibility geotextile fabric overlain by at least one foot of clean fill, in landscaped areas). Although both the Site and the Brewery Parcel are part of the former Narragansett facility, they are separate properties. Accordingly, CMG is submitting a separate RAWP to address the excavation and loading of soils at the Brewery Parcel portion of the former Narragansett facility concurrently with this plan, as requested by Mr. Leo Hallested of DEM.

CMG has established the following best management practices to address items required by Rule 9.03. Currently, DiGregorio is the contractor CP Associates and Trolley Barn Associates have designated as the contractor to conduct all Site excavation and soil relocation activities. Should this change, CMG will inform DEM prior to the commencement of soil excavation activities, and assess the impact, if any, on completion of the work proposed herein.

4.1 PREVENT INFILTRATION/MIGRATION OF HAZARDOUS SUBSTANCES [RULE 9.03A]

When development of the Site is complete, over 90 percent of impacted soils at the Site will be overlain by buildings or impervious asphalt and concrete surfaces, with the remainder overlain by up to 4.5 feet of clean fill. Consequently, impacted soils will not experience any significant water infiltration from precipitation and surface runoff, resulting in very low potential for contaminant leaching once development is complete. CMG notes that the depth to groundwater at the Site ranges from approximately 24 to 36 feet below grade, with no potential direct contact between COC-impacted soils and groundwater.

4.2 PREVENT DIRECT CONTACT WITH HAZARDOUS SUBSTANCES [RULE 9.03B]

The proposed development of the Site will isolate COC-impacted soils underneath building, asphalt/concrete surfaces and/or 2.5-4.5 feet of clean fill (depending on grading). Any areas with COC-impacted soils remaining unpaved (e.g. landscaped areas) must have at least two feet of clean fill cover or a layer of highly visible geotextile fabric overlain by at least one foot of clean fill. This will eliminate incidental exposure to Site soils and limit potential exposures to short duration period by Site workers during utility repairs or upgrades to the Site that require excavation in to impacted soils. As soil from the Brewery Parcel arrives, DiGregorio will spread, compact (if necessary) and then cover the Brewery Parcel soils with clean fill to prevent direct contact exposures in advance of building construction and paving activities.

Upon completion of the project, CMG will prepare a post-remediation Soil Management Plan specifying conditions, restrictions, and provisions for anything other than passive use of the Site.

4.3 ELIMINATE VOLATILIZATION & ENTRAINMENT OF HAZARDOUS SUBSTANCES [RULE 9.03C]

Volatility is a physical measurement of how rapidly a liquid substance will evaporate (or a solid substance will sublime) into ambient air. In general, the more volatile a substance is, the easier it is to transfer between environmental media (such as from soil to groundwater, or groundwater to air). This affects the mobility of a contaminant – its ability to migrate through the environment or transfer between media. Volatility is usually expressed in terms of a substance's vapor pressure (p°) in barometric units of millimeters of mercury at 0°C (mm Hg) or the equivalent unit “torr.” Vapor pressure data must specify temperature and pressure, because volatility is a gas function.

PAHs have extremely low vapor pressures, generally on the order of $p^\circ < 10^{-9}$ torr. Elemental arsenic and lead have even lower vapor pressures ($p^\circ < 10^{-12}$ torr). However, metals and other inorganic contaminants usually exist as ionic forms (salts or dissolved cations or anions) in the environment, and as such are even less volatile. Therefore, CMG opines that there will be no significant impacts of volatilization associated with impacted soil at the Site.

CMG proposes to wet impacted soils during unloading and grading activities to mitigate against fugitive dust from COC-impacted soils.

4.4 MINIMIZE & MANAGE SURFACE RUNOFF FROM THE AREA [RULE 9.03D]

DiGregorio will use a combination of silt fence and hay bales during construction to minimize and manage surface water runoff at the Site. The Site does not contain any steep grades; therefore, successful control of surface water runoff should be relatively easy.

5.0 REMEDIATION OF IMPACTED GROUNDWATER [RULE 9.04]

Based on the data presented of the Paragon December 2000 LSI, CMG opines that significant impact to groundwater is highly unlikely to occur.

6.0 LIMITED DESIGN INVESTIGATION [RULE 9.05]

CMG opines that this rule does not apply to this Site as the DEM has not required or specified inclusion of a Limited Design Investigation in the RAWP. Further, given the simplicity of the proposed remedial actions, CMG does not consider development of a Limited Design Investigation warranted.

7.0 POINTS OF COMPLIANCE [RULE 9.06]

CMG intends to collect a sample for every 500 cubic yards of soil excavated from the Brewery Parcel and transferred to the Trolley Barn Parcel. We will collect these samples as points of compliance (POC) after the material has been placed and graded prior to DiGregorio covering it with clean fill. Further, we will record the final location of sample in the event laboratory analysis identifies impacts inconsistent with existing data for the Brewery Parcel soils. CMG intends to submit the POC samples for laboratory analysis of PAHs and total RCRA8 metals.

In addition to POC sampling, CMG will collect a sample every from 500 cubic yards of clean fill brought to the Site and submit one sample per 2,000 cubic yards for laboratory analysis of PAHs and RCRA 8 metals. CMG proposes that all clean fill brought to the Site meet, at a minimum, Method 1 Residential Direct Exposure Criteria and GB Leachability Criteria. Either CMG or DiGregorio Site personnel will stop shipments of soils designated as clean fill if we/they observe any evidence of contamination such as staining, odors, of anthropogenic materials.

8.0 PROPOSED SCHEDULE FOR REMEDIATION [RULE 9.07]

As noted in Section 3.5 above, CP Associates and Trolley Barn Associates intend to transfer impacted soils excavated at the Brewery Parcel portion of the former Narragansett facility to the Site portion of the former Narragansett facility for use as grading material within the next 60 days.

9.0 CONTRACTORS AND/OR CONSULTANTS [RULE 9.08]

CP Associates, LLC and Trolley Barn Associates, LLC have hired the following consultant and contractor to implement the remedy proposed in this RAWP.

CONSULTANT & CONTRACTOR

COMPANY	CMG Environmental, Inc. 600 Charlton Street Southbridge, MA 01550 (508) 765-8510	DiGregorio Corporation Smithfield, Rhode Island
CONTACT	Benson Gould or Andrew Donoghue	To be determined
RESPONSIBILITY	Environmental	Construction

10.0 SITE PLAN [RULE 9.09]

Figures 2 and 3 in Appendix A present the overall layout of the Site, existing data points, and the proposed relocation area for Brewery Parcel soils.

11.0 DESIGN STANDARDS & TECHNICAL SPECIFICATIONS [RULE 9.10]

Implementation of this RAP does not require the construction/installation or operation of any remedial systems. Accordingly, CMG does not believe Rule 9.10 is applicable to the proposed remedy given its simplicity. However, plans and specifications for related to the placement of capping materials and structures (e.g. building footprints, paved areas, and landscaped areas with geo-textile fabric overlain by a minimum of one foot of clean fill or at least two feet of clean fill) stamped by a Rhode Island Professional Engineer can be provided upon request as a condition for approval.

12.0 SET-UP PLANS [RULE 9.11]

As an engineered control measure, Trolley Barn Associates will arrange for the placement of between 2.5 and 4.5 feet of clean fill (but no less than two feet of clean fill or a layer of high visibility geotextile fabric overlain by at least one foot of clean fill in areas eventually landscaped) over the Brewery Parcel soils brought to the Site. After the completion of Site development activities, buildings or pavement will cover approximately 90 percent of the Site

12.1 IMPROVEMENTS

Planned improvements generally include raising and leveling the existing grade, the construction of one or more buildings on the front third of the Site (along Cranston Street) and the completion of asphalt-/concrete-paved parking lots, drives, walkways and loading areas.

12.2 FUGITIVE DUST CONTROL

Workers must take adequate standard precautions when conducting excavation or other activities involving exposure to subsurface soil within the boundaries of the Site or transferred from the Brewery Parcel, to minimize dermal contact with contaminated soils and inhalation of fugitive dust. Such precautions could include use of personal protective equipment, wetting of dry soil with potable water, or use of a dust control agent (such as calcium chloride or magnesium chloride).

CMG and/or DiGregorio personnel will conduct visual inspections for fugitive dust from the Site during construction activities as well as monitor ambient aerosol levels with a portable meter.

DiGregorio personnel will wet the excavation area as many times daily as necessary during soil unloading and grading activities to control dust.

12.3 SOIL EXCAVATION

Workers are to wet soil in the work area to minimize or eliminate dust migration. Therefore, CMG does anticipate the need to use personal protective equipment such as respirators for this

Construction Trailer

14.2 EMERGENCY RESPONSE PROCEDURES & ARRANGEMENTS

CMG and our DiGregorio will adhere to the following emergency response procedures and arrangements in the event of an unexpected incident involving hazardous materials at the Site during the implementation of this RAWP:

- Release of Petroleum or Other Hazardous Liquid: The DiGregorio will provide an emergency spill kit including absorbent booms, pads, polyethylene sheeting, 55-gallon drums, speedy-dry, hand tools, and any other equipment deemed necessary to contain such a release. CMG will notify DEM immediately of any releases and, if conditions warrant, the Cranston Fire Department. CMG will arrange for dispatch of other spill recovery equipment if necessary. CMG notes that the only petroleum or other hazardous liquid we anticipate being present at either Site or Brewery Parcel portions of the former Narragansett facility will be fuel in equipment and vehicle tanks.
- Buried Hazardous Materials Containers or Underground Storage Tanks (USTs): CMG or DiGregorio will order the immediate cessation of all excavation activities if any buried drums, USTs, containers, or loose hazardous materials (i.e., asbestos, chemical powders or residues, etc.) are encountered, secure the area, and immediately notify DEM and the Cranston Fire Department. Upon inspection and approval of DEM, CMG will direct additional response actions to fully characterize and mitigate any hazardous conditions we encounter. CMG notes, however, that Trolley Barn Associates does not intend to significantly excavate soils at the Site during re-grading activities.
- Damage to an Unmarked Underground Utility: DiGregorio will verify the location of all underground utilities and will ensure "DIGSAFE" notification one week prior to initiating excavation activities. DiGregorio will cease excavation activities if they encounter any unmarked utility lines. If a gas line is encountered, DiGregorio will shutdown all equipment, evacuate the area, and immediately notify the Cranston Fire Department. If we encounter an electrical line, we will notify National Grid to respond and determine if the line is in use. If we encounter water or sewer lines, we will immediately notify the Cranston Water and Sewer Department. If overflow of the excavation occurs as the result of a damaged water line, we will direct the contractor to deploy the emergency spill kit, contact an emergency response contractor or Cranston Fire Department (if conditions warrant), and notify DEM.
- Airborne Dust/Surface Runoff: The contractor will use a portable sprayer filled with water or water truck as necessary to moisten soils during unloading and grading

activities if dust suppression becomes necessary. CMG will direct the contractor to use this method of dust suppression minimally, to prevent soils from becoming saturated or runoff from occurring. After grading impacted soils, DiGregorio will place down two feet or more of clean fill to prevent dust from the impacted soils or, as an interim measure, a thin layer of crushed stone until grading is complete. In areas intended for landscaping, DiGregorio will place at least two feet of clean fill or a layer of high visibility geotextile fabric overlain by at least one foot of clean fill.

CMG considers the occurrence of any incidents involving hazardous materials highly unlikely given the simplicity of the scope of this RAWP and our general knowledge of Site conditions; however, if an incident does occur, we will promptly inform any responding emergency personnel of all hazardous conditions we have identified at the Site.

14.3 HEALTH & SAFETY PLAN

CMG will prepare a Site-Specific HASP detailing all hazardous conditions identified at the Site, including risks posed by all hazardous materials identified at the Site. CMG and DiGregorio will require all personnel wishing or required to enter the work area to read and sign the HASP. CMG will include the emergency contacts and telephone numbers presented in Section 14.1 of this RAWP in the HASP, and we will append a street map indicating the best route to the nearest hospital.

15.0 OPERATING LOG [RULE 9.14]

CMG believes this Rule of the Remediation Regulations relates to in-situ remedial actions or actions involving on-site treatment of contamination, not instances involving encapsulation as the remedial remedy. However, CMG propose to maintain a record that will document the following:

- The location and depth of transferred Brewery Parcel soils and imported clean fill,
- Records of any analyses conducted as part of the proposed remedial action,
- Any implementation(s) of the Contingency Plan, and
- Site inspection records used to document compliance with the provisions of the RAWP.

CMG will prepare and submit to DEM a final document that will demonstrate that the remedial objectives for the Site, as outlined in this document have been met.

16.0 SECURITY PROCEDURES [RULE 9.15]

During work hours, Site personnel will maintain vigilance against unauthorized personnel entering the work area. Currently, all pedestrian and vehicle access points are blocked by chain link fencing with locked gates. At the conclusion of each workday, Site personnel will cover any stockpiled soils with polyethylene sheeting to prevent exposure to trespassers or the generation of airborne dust from stockpiled materials. Although fencing will likely remain or be replaced when redevelopment of the Site is complete, CMG is not proposing this a condition of any future ELUR.

17.0 SHUT-DOWN, CLOSURE & POST-CLOSURE [RULE 9.16]

CMG believes this Rule of the Remediation Regulations relates to in-situ remedial actions or actions involving on-site treatment of contamination, not instances involving encapsulation as the remedial remedy. However, CMG proposes to prepare and submit to DEM a final document that will demonstrate that the remedial objectives for the Site, as outlined in this document have been met.

18.0 INSTITUTIONAL CONTROLS & NOTICES [RULE 9.17]

CMG opines that proposed isolation of impacted soils underneath building footprints, paved surfaces, and 2.5-4.5 feet of clean fill (or, as alternative in landscaped area, a minimum of two feet of clean fill or a layer of highly visible geotextile fabric overlain by at least one foot of clean fill) at both the Site and the Brewery Parcel portions of the former Narragansett facility as described herein (and in the RAWP for the Brewery Parcel) and subsequent implementation of separate ELURs for both properties (to maintain limitation of potential human exposure) constitute a permanent solution.¹ Therefore, we do not believe that Rule 9.17 applies to the Site.

Trolley Barn Associates and CP Associates will record an ELUR in the City of Cranston Land Evidence Records specifying all necessary Site conditions, restrictions, and emergency provisions following remediation.

19.0 COMPLIANCE DETERMINATION [RULE 9.18]

The primary compliance objective for this Site is to eliminate direct exposure to impacted soils by isolation underneath building footprints, asphalt/concrete surfaces, and/or up to 1-4.5 feet of clean.

CMG proposes to demonstrate compliance of the remedial objective/remedy by monitoring and documenting Site activities during grading (and eventually construction activities) associated with isolation of impacted soils at the Site. Additionally, Trolley Barn Associates will provide plans of sufficient detail to show location of buildings, asphalt/concrete surfaces, and landscaped areas (including the depth of clean fill place) for both the Site and Brewery Parcel portions of the former Narragansett facility. These plans will also show final location and depths of impacted soils relocated to the Site.

CMG will prepare and submit to DEM a final document that will demonstrate compliance with the remedial objectives for the Site, as outlined in this document.

20.0 CERTIFICATION REQUIREMENTS [RULE 9.19]

See signature page (preceding the Table of Contents) of this RAWP.

¹ CMG defines “permanent solution” to mean a measure or combination of measures which will, when implemented, ensure attainment of a level of control of each identified substance of concern at a contamination-site or in the surrounding environment such that no substance of concern will present a significant risk of damage to health, safety, public welfare, or the environment during any foreseeable period of time.

National Priorities List (NPL)

This database includes Proposed Sites, Final Sites and Deleted NPL Sites. The Superfund Program, administered under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) is an EPA Program to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. The NPL (National Priorities List) is the list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation.

The boundaries of an NPL site are not tied to the boundaries of the property on which a facility is located. The release may be contained within a single property's boundaries or may extend across property boundaries onto other properties. The boundaries can, and often do change as further information on the extent and degree of contamination is obtained.

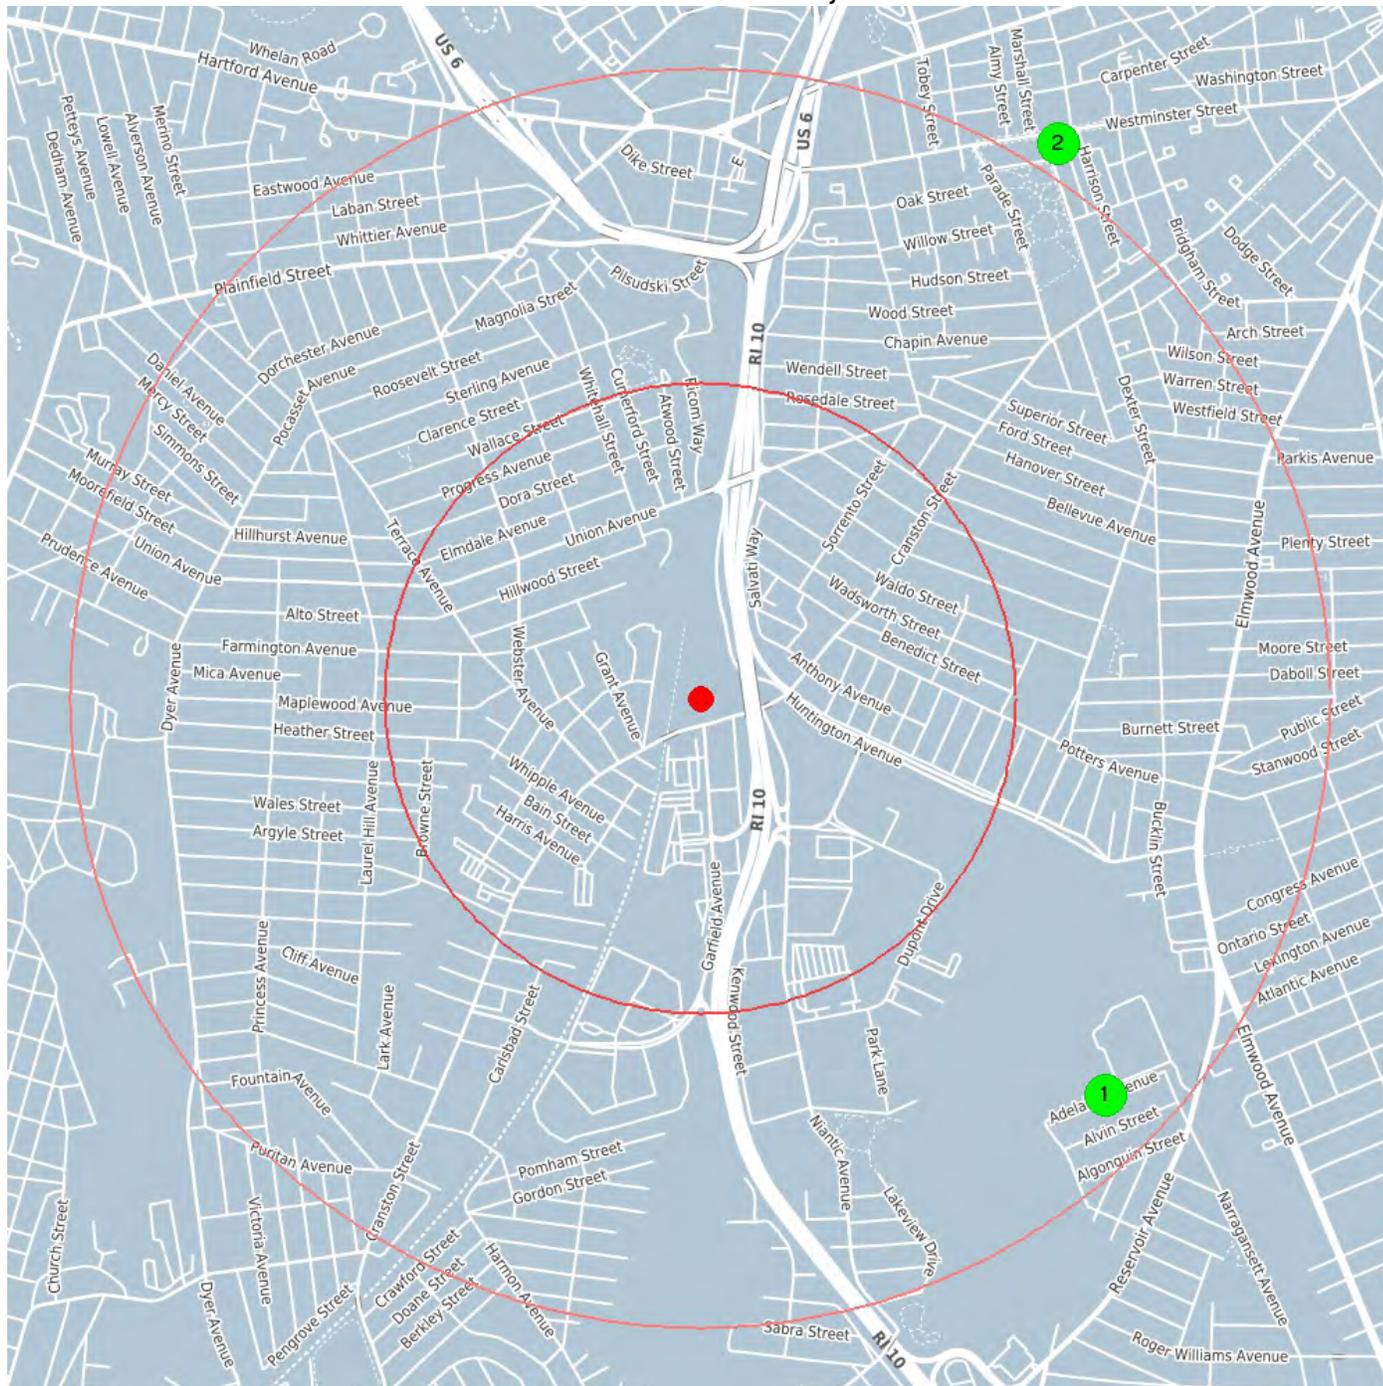

This database returned no results for your area

CERCLIS List

The United States Environmental Protection Agency (EPA) investigates known or suspected uncontrolled or abandoned hazardous substance facilities under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). EPA maintains a comprehensive list of these facilities in a database known as the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). These sites have either been investigated or are currently under investigation by the EPA for release or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation and ultimately placed on the National Priority List (NPL).

CERCLIS sites designated as "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration.

CERCLIS NFRAP

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" NFRAP have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the site being placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed these NFRAP sites from CERCLIS to lift unintended barriers to the redevelopment of these properties. This policy change is part of EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens promote economic redevelopment of unproductive urban sites.

RCRA CORRACTS Facilities

The United States Environmental Protection Agency (EPA) regulates hazardous waste under the Resource Conservation and Recovery Act (RCRA). The EPA maintains the Corrective Action Report (CORRACTS) database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing "corrective action." A "corrective action order" is issued pursuant to RCRA Section 3008(h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predated RCRA.

This database returned no results for your area

RCRA non-CORRACTS TSD Facilities

The United States Environmental Protection Agency (EPA) regulates hazardous waste under the Resource Conservation and Recovery Act (RCRA). The EPA's RCRA Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste. RCRA Permitted Treatment, Storage, Disposal Facilities (RCRA-TSD) are facilities which treat, store and/or dispose of hazardous waste.

Emergency Response Notification System (ERNS)

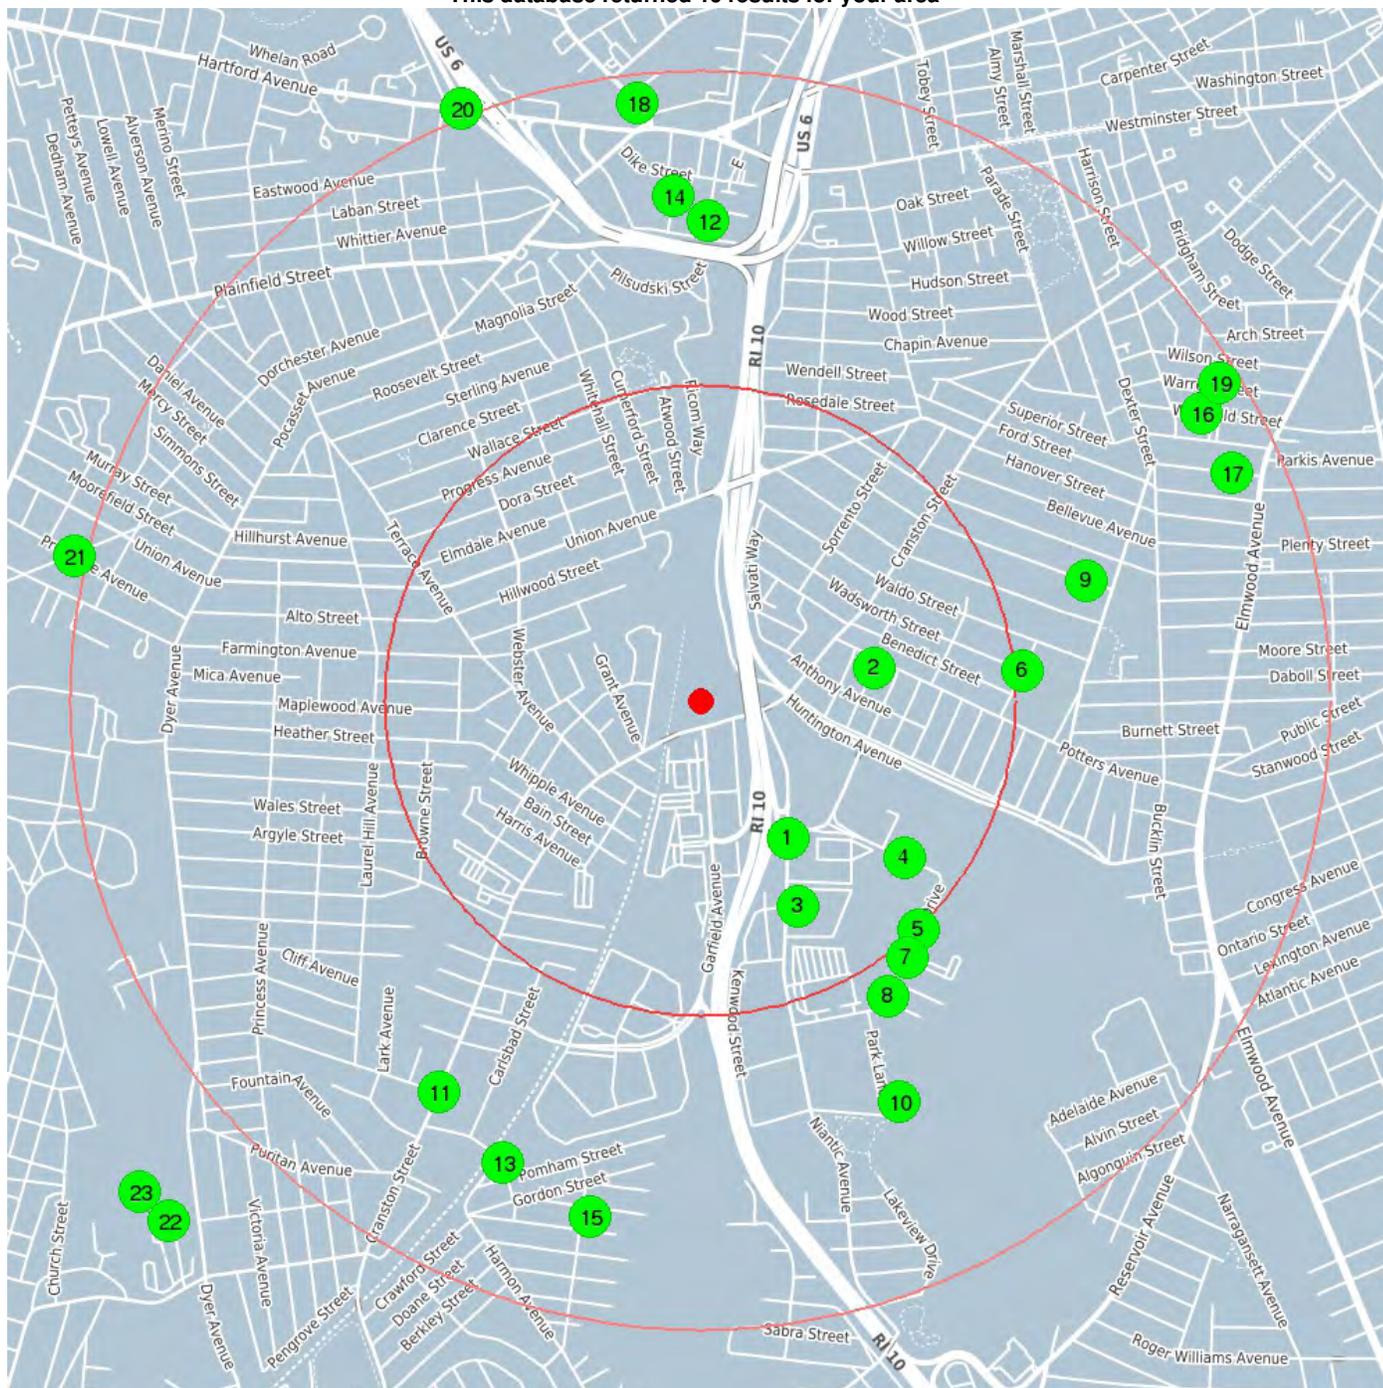

The Emergency Response Notification System (ERNS) is a national computer database used to store information on unauthorized releases of oil and hazardous substances. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's John Volpe National Transportation System Center and the National Response Center. There are primarily five Federal statutes that require release reporting: the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) section 103; the Superfund Amendments and Reauthorization Act(SARA) Title III Section 304; the Clean Water Act of 1972(CWA) section 311(b)(3); and the Hazardous Material Transportation Act of 1974(HMTA section 1808(b).

This database returned no results for your area

US Toxic Release Inventory

The Toxics Release Inventory (TRI) is a publicly available EPA database that contains information on toxic chemical releases and other waste management activities reported annually by certain covered industry groups as well as federal facilities. TRI reporters for all reporting years are provided in the file.

US ACRES (Brownfields)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. The Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an online database for Brownfields Grantees to electronically submit data directly to The United States Environmental Protection Agency (EPA)

US NPDES

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

US Air Facility System (AIRS / AFS)

The Air Facility System (AIRS / AFS) contains compliance and permit data for stationary sources of air pollution (such as electric power plants, steel mills, factories, and universities) regulated by EPA, state and local air pollution agencies. The information in AFS is used by the states to prepare State Implementation Plans (SIPs) and to track the compliance status of point sources with various regulatory programs under Clean Air Act.

MA Underground Storage Tanks

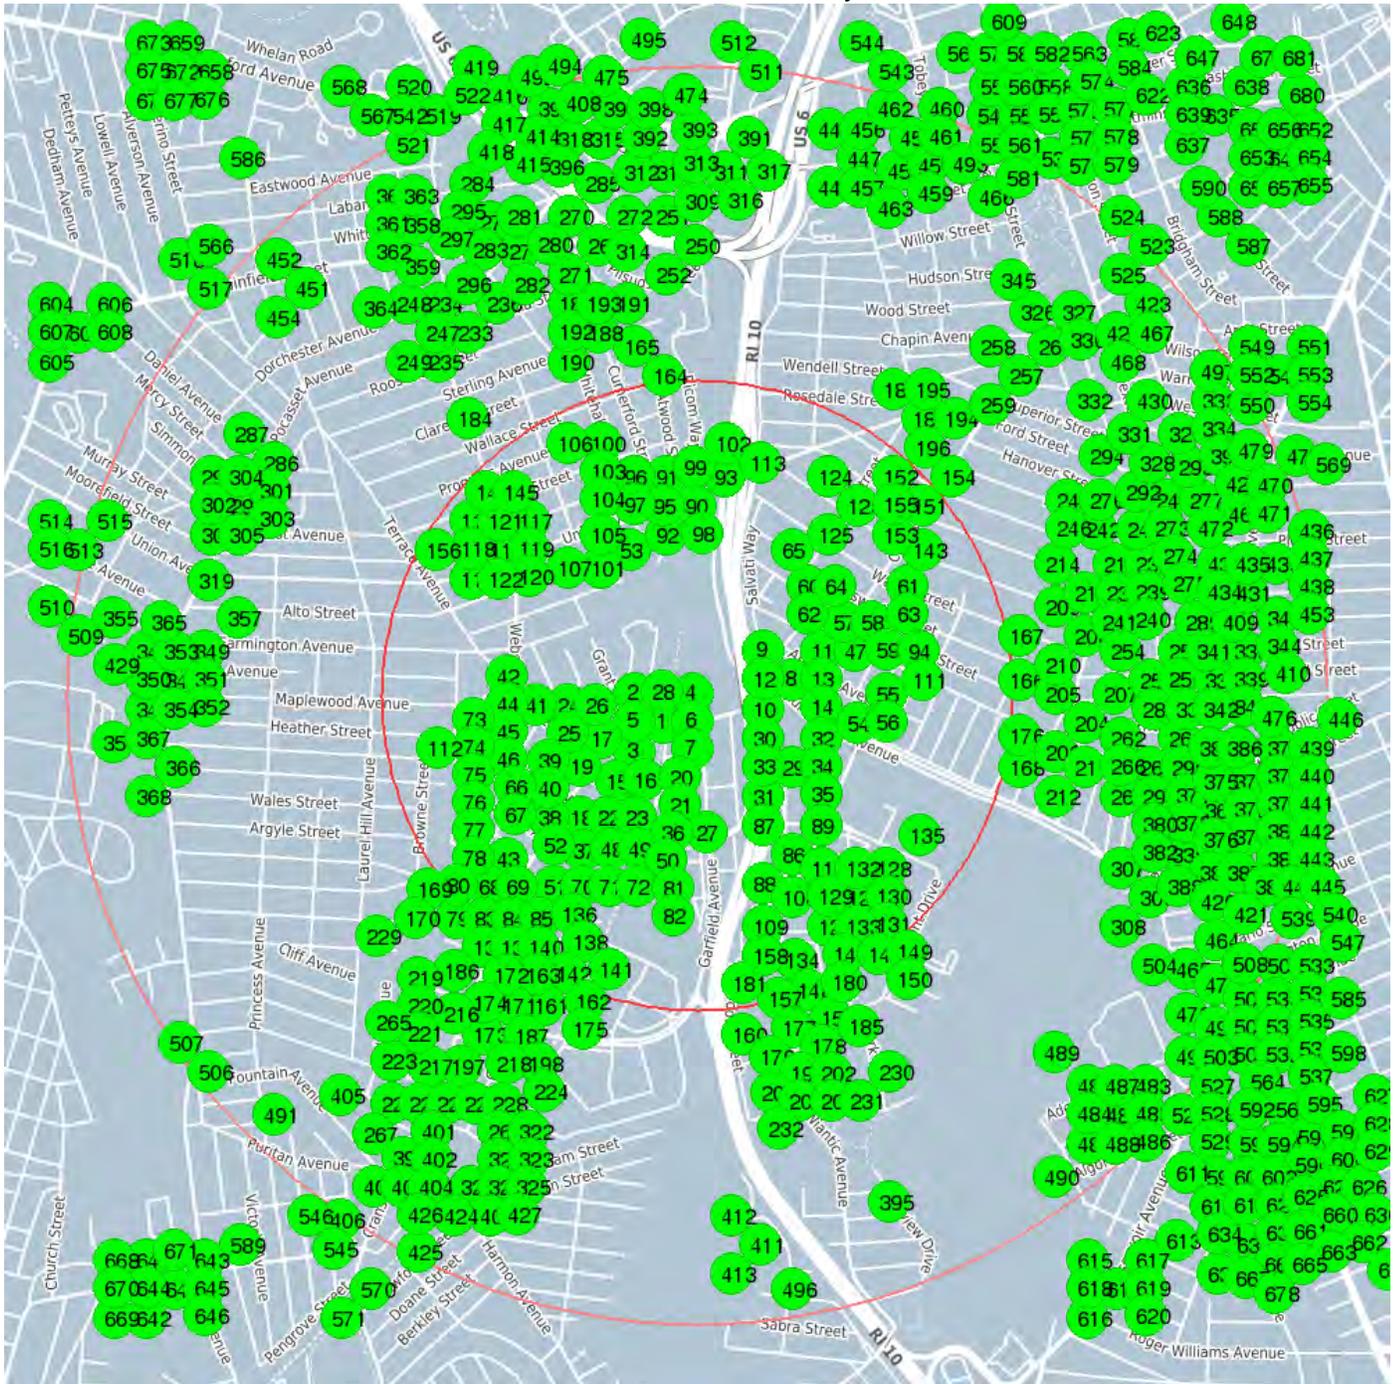

Underground Storage Tanks (UST) containing hazardous or petroleum substances are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The Massachusetts Department of Environmental Protection (MassDEP) maintains a list of registered USTs.

The Underground Storage Tank (UST) Program is a major component of the Massachusetts groundwater resource protection effort. MassDEP implements federal requirements that address registration and inspection of UST systems that store petroleum fuels or hazardous substances. UST systems that are found to be leaking or otherwise not functioning properly must be repaired or replaced, and any resulting environmental damage must

MA Leaking USTs & Hazardous Waste Sites

The Massachusetts Department of Environmental Protection, Bureau of Waste Site Cleanup is charged with ensuring immediate and effective response to environmental emergencies, such as oil spills, as well as timely assessment and cleanup of oil and hazardous waste disposal sites by parties responsible for them. The Bureau maintains a database of Hazardous Waste sites which includes Leaking Underground Storage Tanks (LUST) and reportable releases.

This database returned no results for your area

MA Activity Use Restrictions

Activity and Use Limitations (AULs), also known as Environmental Land-Use Controls (LUCs) â€” An AUL is a restriction, covenant or notice concerning the use of real property, which is imposed on real property. AULs and LUCs are further categorized as Institutional Controls (ICs) and Engineering Controls (ECs). An IC is a legal or regulatory restriction on the use of a property, limiting the use of groundwater and excavations or preventing such businesses as day care centers or schools on the property. An EC involves physical means of restricting site access or use in order to prevent the spreading or exposure of a contaminant. Frequently implemented engineering controls include requiring black top on the surface, building of structures to prevent exposure or even notices to the public that are posted on the grounds warning of contaminants. The Massachusetts Department of Environmental Protection (MassDEP) maintains a list of Activity Use Restrictions.

This database returned no results for your area

MA Solid Waste Facilities

The Massachusetts Department of Environmental Protection, Bureau of Waste & Recycling maintain a database of Active, Inactive and Closed Solid Waste Facilities.

This database returned no results for your area

MA Historic Leaking USTs and Spills

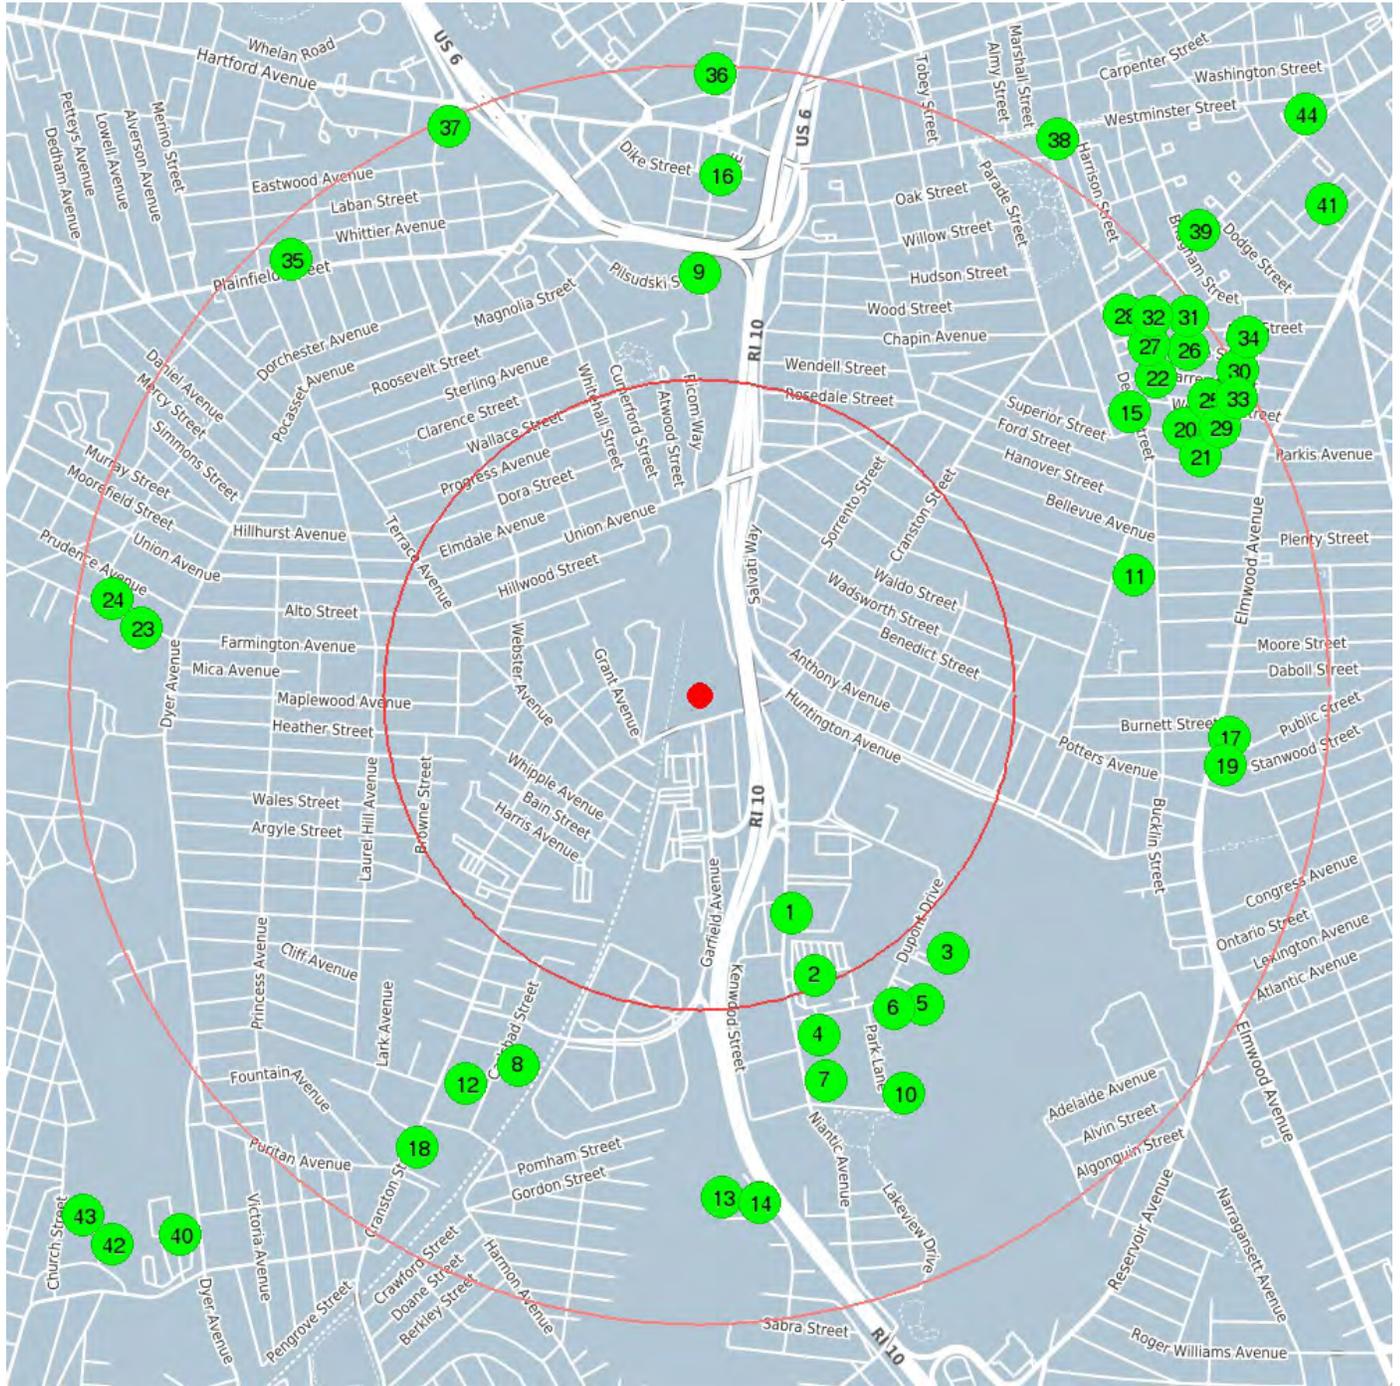

The Massachusetts Department of Environmental Protection, Bureau of Waste Site Cleanup is charged with ensuring immediate and effective response to environmental emergencies, such as oil spills, as well as timely assessment and cleanup of oil and hazardous waste disposal sites by parties responsible for them. The Historic Spills Database was the release notification tracking system for spills that occurred prior to October 1, 1993.

APPENDIX D: STAFF QUALIFICATIONS

ZOEY M. SPRACKLEN

ENVIRONMENTAL PROFESSIONAL

PROFESSIONAL QUALIFICATIONS

Ms. Spracklen is a United States Environmental Protection Agency (USEPA) All Appropriate Inquiries (AAI) Qualified Environmental Professional (EP) and has over 15 years of experience in the environmental consulting and engineering industries, including performing and managing Phase I and II environmental site assessments (ESAs) for several national environmental firms and prestigious national clients. Ms. Spracklen has also performed and managed numerous projects involving site mitigation and remediation services; industrial hygiene consulting services, including asbestos-containing material (ACM), lead-based paint (LBP), radon, and mold surveys; geotechnical investigations; facility/property condition assessments (FCAs/PCAs); and the preparation of land surveys and zoning reports.

PROFESSIONAL EXPERIENCE

Environmental and Engineering Field Work

Project Staff for various field activities including Phase I and II ESAs, geotechnical investigations, percolation tests, hand auger sampling, and site reconnaissance. Operational duties included managing and tracking accounts receivables and payables, insurance brokering, quality control/quality assurance, project management, maintaining vendor relationships, and overseeing report preparation.

Environmental and Engineering Program/Project Management

Managed a wide range of project types across the USA, Mexico, and Canada, including project scopes involving environmental assessment and remediation, industrial hygiene, storm water, land surveying, geotechnical engineering, zoning and title reports, and building sciences for various private and public sector clients.

Orange County Great Park, Irvine, California

Program Manager for large-scale soil remediation, demolition, and grading activities performed as part of the redevelopment of the former Marine Corps Air Station El Toro. Coordinated and scheduled subcontractors required to perform all phases of the remedial soil excavation. Obtained required shoring and grading permits. Managed the project to assure proper health and safety procedures were followed, adequate daily field notes were taken, encountered change orders were filed in a timely manner, subcontractors were following the remedial design plans, conducted Storm Water Pollution Prevention Program (SWPPP) and task schedule timelines were met to assure that the project was completed on time.

USEPA Brownfields Redevelopment Project, Rialto, California

Program Manager for large-scale soil remediation, demolition, and grading activities performed as part of the redevelopment of a former metal works and industrial plant in the City of Rialto, California. The remediation of the site was funded using USEPA Brownfield Grant Funds and was administered by the City of Rialto. Managed multiple subcontractors, coordinated vendor setup and payments, and provided support to the construction manager and field staff.

ZOEY M. SPRACKLEN
ENVIRONMENTAL PROFESSIONAL

Condo Complex, Santa Ana, California

Project Manager for lead-based paint (LBP) testing, monitoring, and reporting activities associated with a painting and renovation project at a condominium complex in Southern California.

Nationwide Due Diligence Services

Managed various environmental due diligence portfolios for several large retail and banking clients, regional and national developers, and real estate investment firms. Services included providing Phase I and II site assessments, remediation, geotechnical investigations, land surveys, asbestos and lead-based paint surveys, and regulatory compliance activities.

Real Estate Acquisition Program, Mexico

Managed an environmental and building science pre-acquisition due diligence program for a major real estate trust. The project involved the assessment of over 75 sites located across northern Mexico. In addition to the assessment and reporting activities, the project required specialized site access coordination, including private security escorts for the project field staff working in dangerous locations along the United States and Mexico border areas. The project was successfully completed on an expedited timeline in order to meet the client's due diligence schedule.

Curtis School, Los Angeles, California

Program Manager for multiple geotechnical investigations and reporting activities for the expansion of an existing private school in southern California. Coordinated field staff, drilling subcontractors, and preparation of the geotechnical report, including the figures, boring logs, and cross-sections.

Los Angeles Department of Recreation and Parks, Los Angeles, California

Program Manager for environmental site assessment, remediation, and compliance projects for the Los Angeles Department of Recreation and Parks under a Master Services Contract to provide support for real estate acquisitions as part of the department's 50 Parks Initiative. Specific projects included various types of impacted sites undergoing assessment and remediation for reuse as a city park, including gas stations, plating facilities, dry cleaners, and a former government building.

Port of Los Angeles, Ports O' Call Village, Los Angeles, California

Program Manager for an environmental site assessment of the Ports O' Call Village at the Port of Los Angeles. The project included extensive historical research, including interviews and reviews of historic aerial photographs from the Port's onsite library. The site included a 35-acre area which had a history of various industrial uses spanning a period of over 100 years. Assisted with the preparation and the submittal of the draft and final reports.

Castrol Industrial North America, Los Angeles, California

Project Manager for the preparation of a Phase II Environmental Site Assessment, site specific Health and Safety Plan, and soil management plan for the former United States Castrol Industrial North America headquarters. The site work was performed on behalf of a developer planning to redevelop the site with three large refrigerated warehouse buildings and office spaces. The project included extensive negotiations with the Department of Toxic Substances Control, as well as coordination with other responsible parties and their environmental consultants. Successfully obtained site closure by completing a human health based risk assessment.

ZOEY M. SPRACKLEN
ENVIRONMENTAL PROFESSIONAL

BKK Landfill, West Covina, California

Performed research and subsequent data collection of client's waste manifests in order to support their argument and claim in court. The project included reviewing all of the client's waste manifests spanning from several decades and categorizing the waste in type of waste, container and weight.

Lake San Marcos, San Marcos, California

Performed research and subsequent data collection on local dairy farms that could have potentially contaminated Lake San Marcos with dairy waste. The litigation support tasks included reviewing San Diego County Water Board records, county inspection records, historic topographic maps and client provided data. The data collected supported the client claim that the nearby dairy farms contaminated the lake with dairy waste.

Produce Farm, Bakersfield, California

Performed research and subsequent data collection on behalf of a large oil producing company that was defending a claim that their brine water waste injection wells were contaminating a local produce farm. The litigation support tasks included reviewing available Kern County Water Quality Reports, information retrieved from the Division of Oil, Gas, and Geothermal Resources website, as well as client provided information.

Health and Safety Plans

Prepared site specific Health and Safety Plans for numerous sites undergoing Phase II Environmental Site Assessments as well as remediation. Several plans were reviewed and approved by various government agencies.

Superfund Site, Phase I Environmental Site Assessment, Arizona

Performed an environmental site assessment on a portion of land located within a Superfund Site in Maricopa County, Arizona. The portion of land will be developed as a landscape research project which engages local students from several universities to study desert tolerant plants and trees.

REGISTRATIONS, CERTIFICATIONS, AND SPECIALIZED TRAINING

USEPA All Appropriate Inquiries (AAI) Qualified Environmental Professional (EP)

EDUCATION

Environmental Coursework, University of California, Irvine Extension
BA, Psychology, Webster University, St. Louis, Missouri
